

DCMI Kernel Metadata Working Group

4 Oct 2006 – DC2006, Manzanillo, Mexico

Quién, Qué, Cuándo, Dónde,
(Cómo, Por qué)

Who, What, Where, When,
(How, Why)

Kernel Working Group

- Established: October 2002, currently 55 subscribers
- What Kernel metadata looks like:

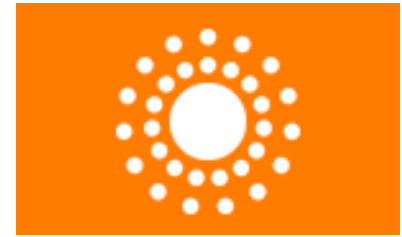

```
erc:  
who:   National Research Council  
what:  The Digital Dilemma  
when:  2000  
where: http://books.nap.edu/html/digital%5Fdilemma
```

- Or, even shorter:

```
erc: National Research Council  
    | The Digital Dilemma | 2000  
    | http://books.nap.edu/html/digital%5Fdilemma
```

- Task: express this as a DCMI application profile

Kernel WG Meeting

- Reviewed Kernel metadata for newcomers
 - Semantics and mapping from original DC elements
 - First record syntax ERC (Electronic Resource Citation)
 - Support by search engines, use in information schools, new use in Tiny HTTP URL Mapping Protocol (THUMP)
- Pete Johnston:
 - Commentary on Kernel Application Profile (KAP) conformance to DCMI Abstract Model
- Alistair Miles: SKOS perspective
- Jane Greenberg: Tools Working Group perspective

¡Wanted: help completing the Kernel Application Profile!
