

Historic England

# National Security Copy (NSC) Process Overview

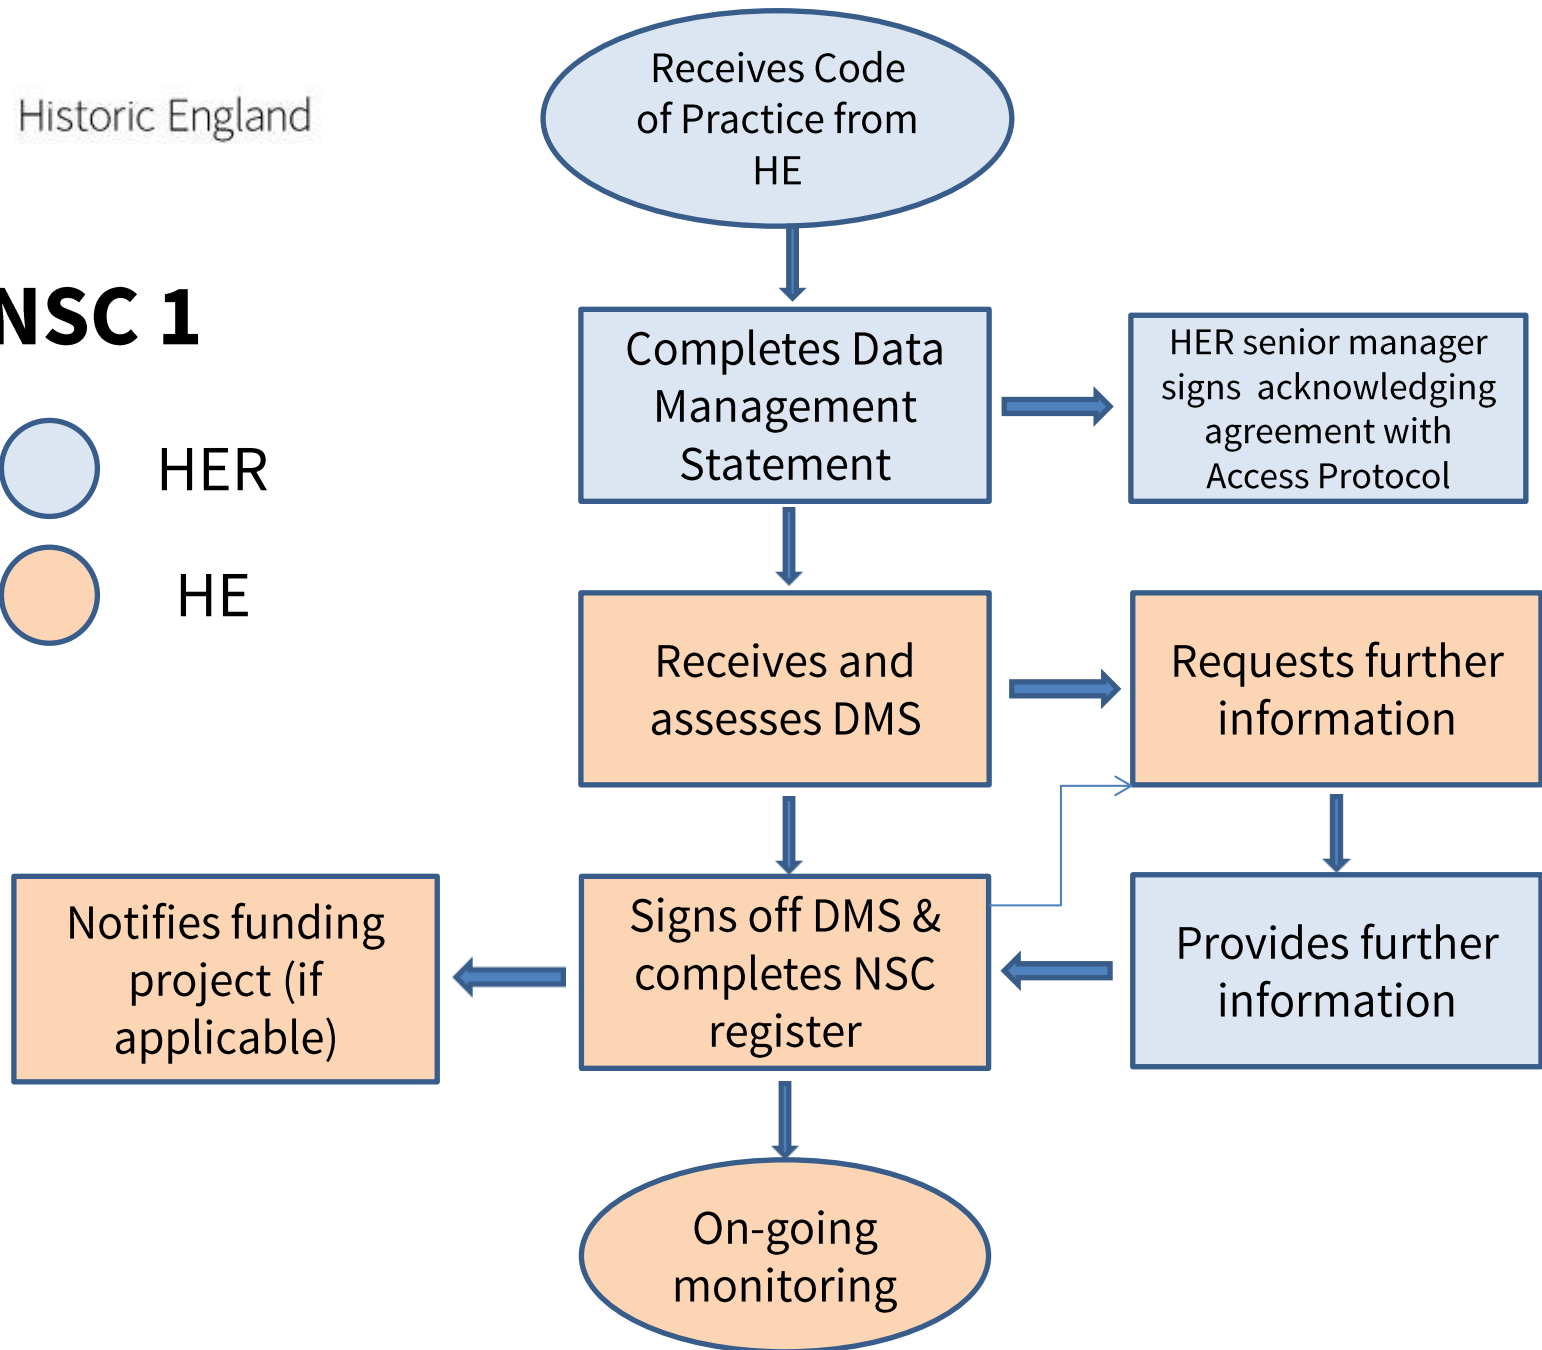

## **NSC Code of Practice**

Two main types of security copying:

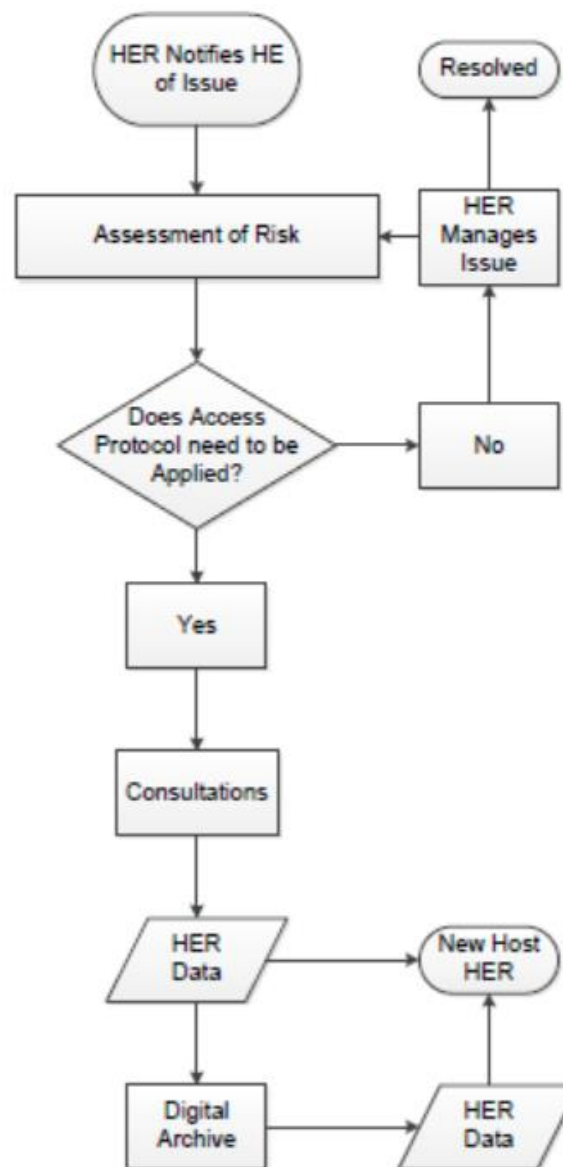

1. Consistent routine backups by each organisation of their own data (**Data Management Statement**)
2. Exceptional decision to deposit a security copy with another heritage organisation (**Access Protocol**)

# NSC 1

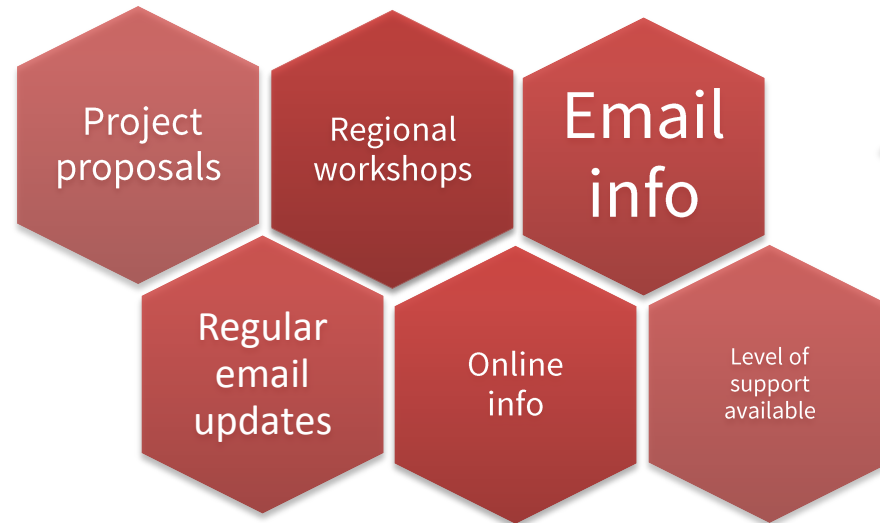

## NSC 2

Exceptional decision to deposit a security copy with another heritage organisation (**Access Protocol**)

# HER Survey 2019

## HIAS: Additional information/support required?

## Communication

Historic England

# How can we help you to participate in HIAS?

- HER Audits: programme & support
- Heritage Gateway: joining options
- National Security Copy
- Contact: [HIPsTeam@HistoricEngland.org.uk](mailto:HIPsTeam@HistoricEngland.org.uk)

Prerequisites for NRHE data transfer

- Beta form being delivered for March 2020.
- There will be a review of the form, and then proceed to Stage 3 (public rollout).
- Stage 3 will see the switchover from old to new application – be done by area to avoid ‘bottle-necking’.
- This will take several months! Old version will remain in place over this period until it is finally switched off and all data archived.

- Before March, every HER will be contacted to confirm their account in (new) OASIS, and with a breakdown of which records will change status.
- NOTE: any record changing status from ‘incomplete’ to ‘complete’ will automatically have the default review period (6 months) implemented.
- You can have a look at the current development at any time!
- Please email [herald@ads.ac.uk](mailto:herald@ads.ac.uk) for more details.
