April-May 2018 Roadshows

# Current international migration statistics

# Latest long-term international migration estimates

# What is net migration?

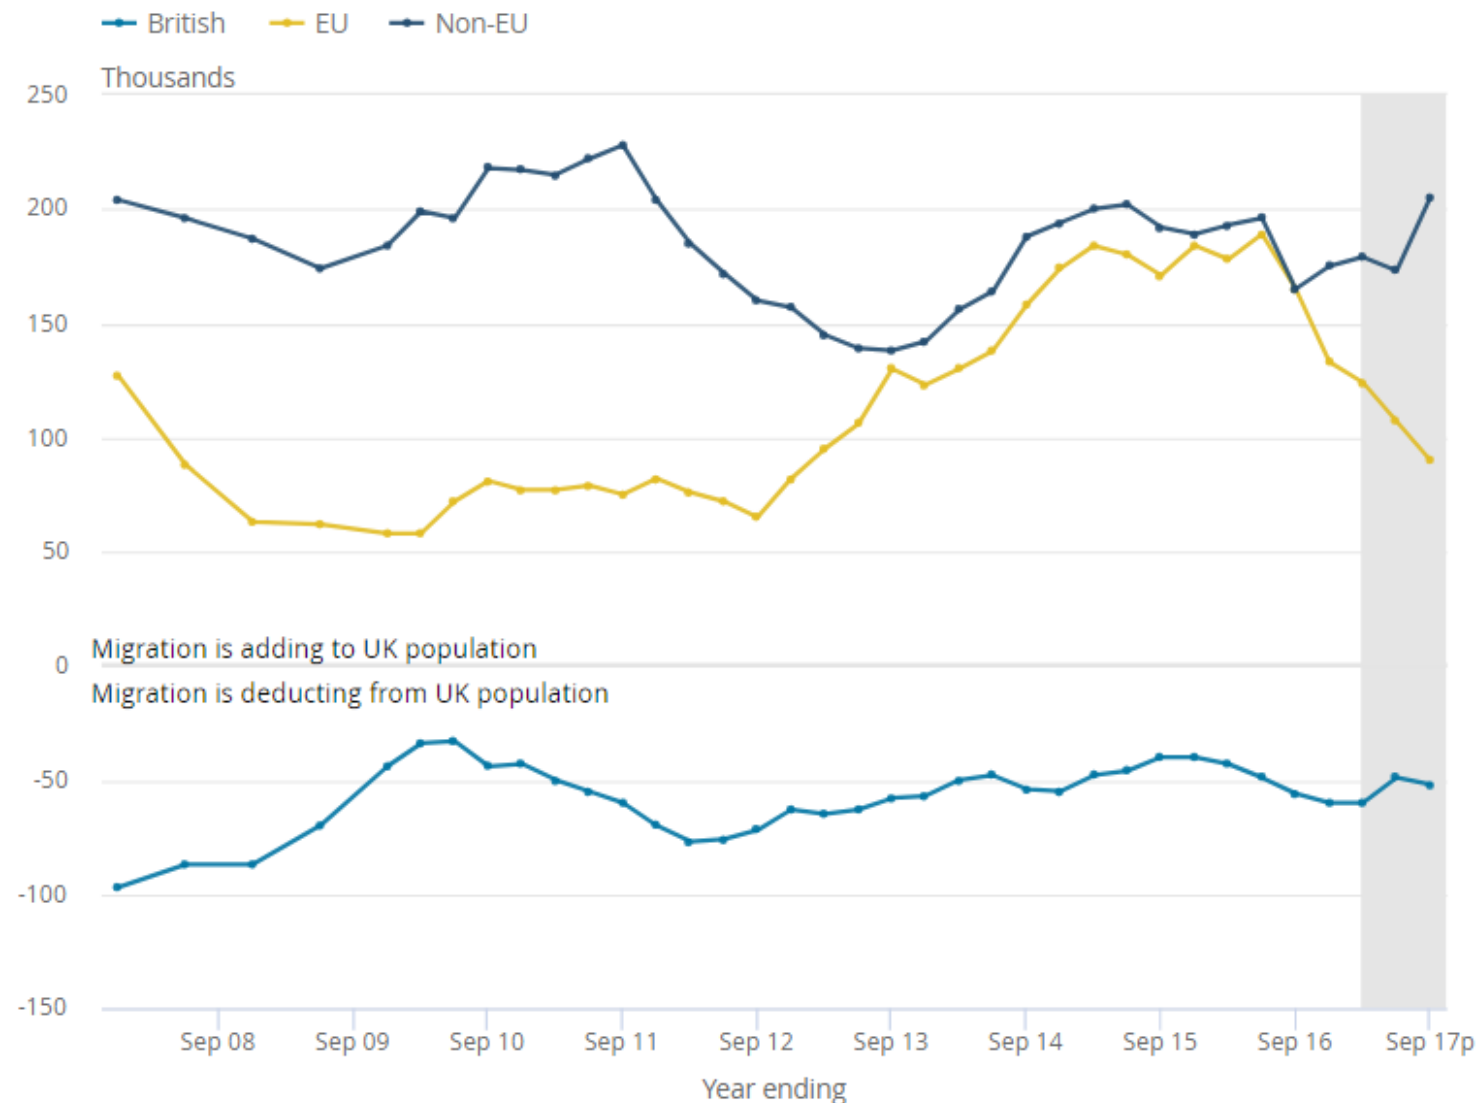

---

**Net migration is the difference between the number of people arriving to live in the UK for over a year and the number of people leaving to live elsewhere for over a year.**

**If net migration is above zero then migration is added to the UK population.**

# Within net migration we've seen differing patterns for EU and non-EU migration

Net migration to the UK by citizenship, UK, 2007 to 2017 (year ending September 2017)

Source: Long-Term International Migration, Office for National Statistics

Notes: Figures for 2017 are provisional. In this chart provisional estimates are shown in a shaded area.

**Net migration of EU citizens decreased by 75,000 over the last year, to the level last seen in 2012**

# EU net migration has fallen as fewer EU citizens are arriving, especially those coming to look for work...

## EU citizens coming to the UK for work

UK, 2007 to 2017 (year ending September 2017)

...and the number leaving has risen. EU net migration has now returned to the level seen in 2012

# Short-term international migration\*

In the year to June-2015...

There were more than twice as many visits abroad (1 to 12 months) than to England & Wales

“Other reasons” were the most common main reason for short-term international migration both to and from England and Wales, including:

Holidays and travelling

Working holidays

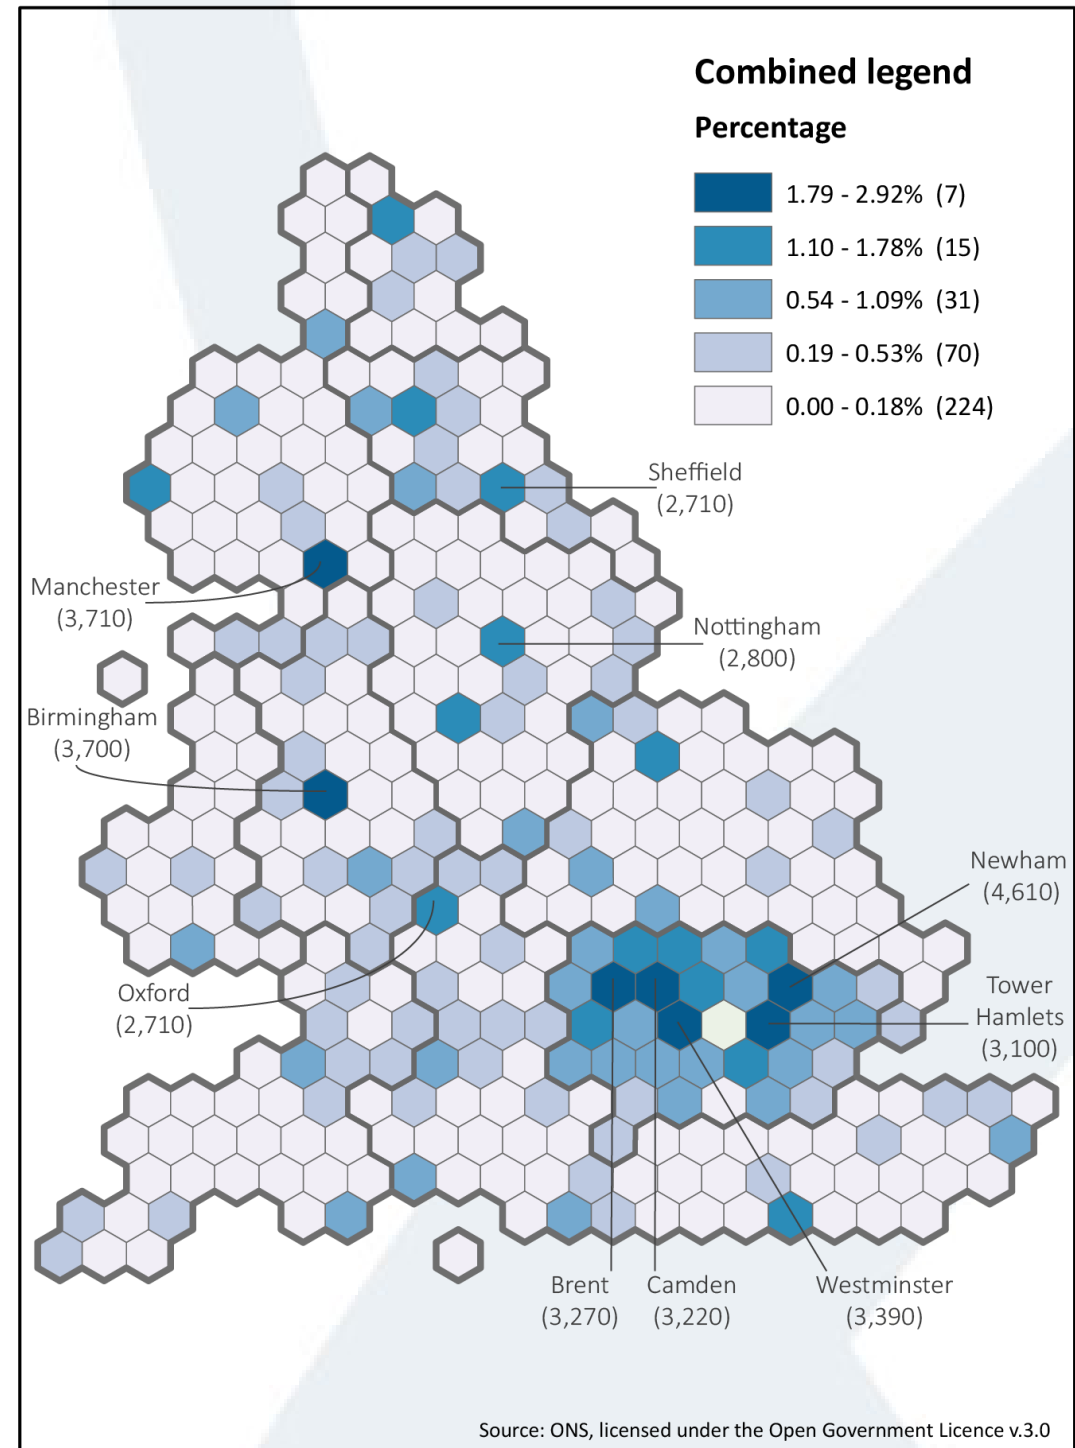

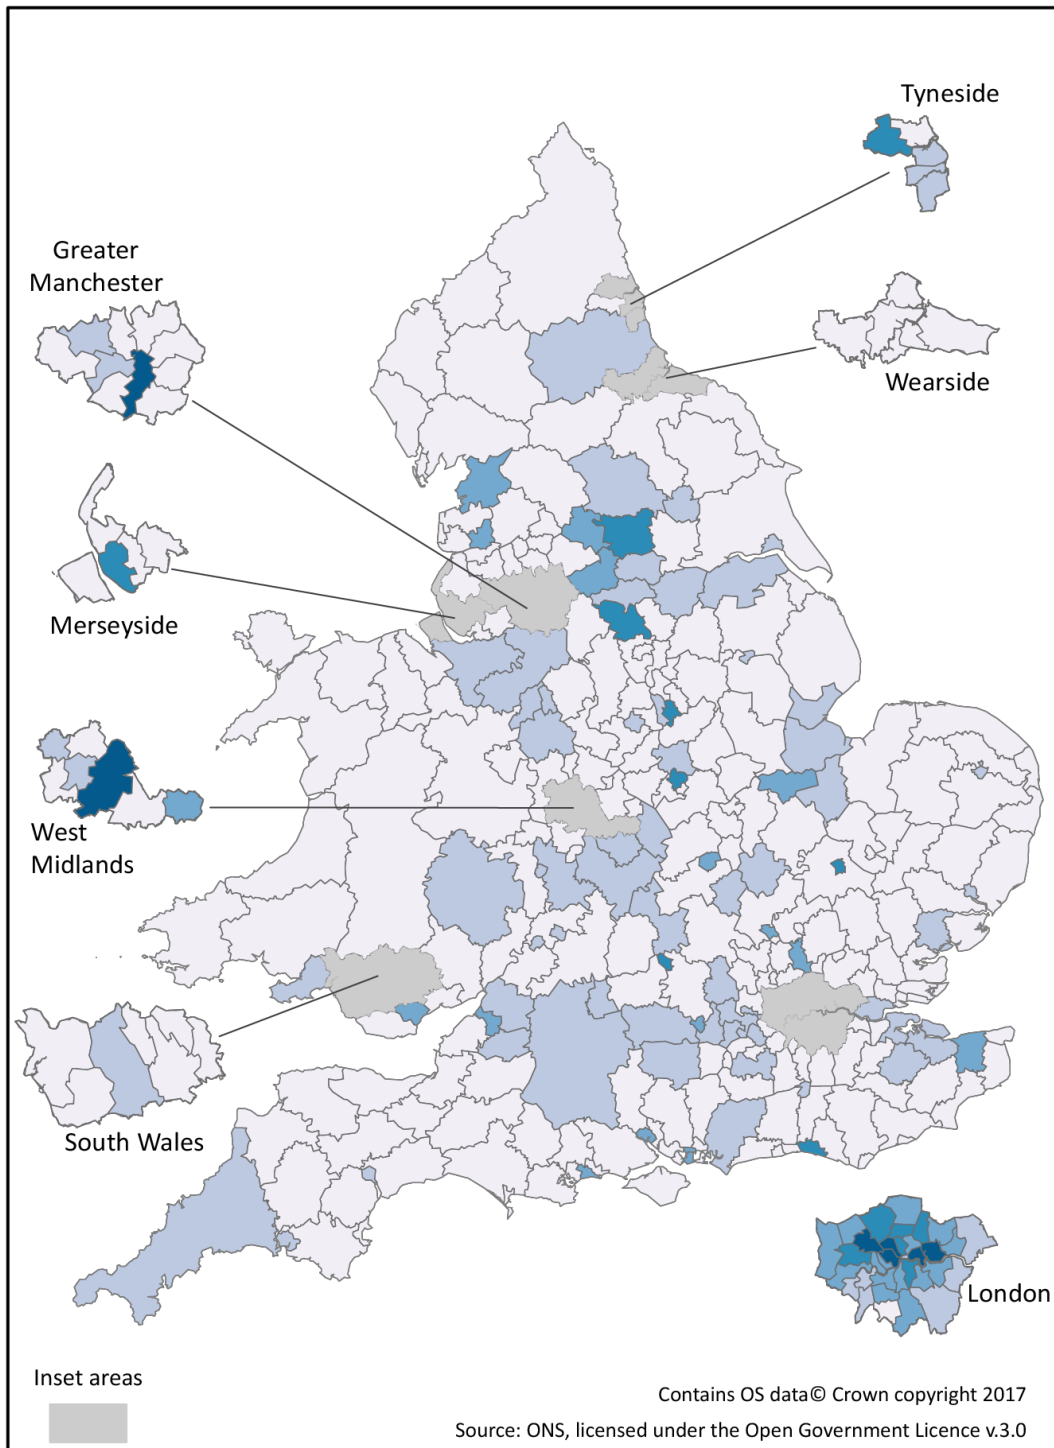

Accompanying family

\*Those that migrate between 1 to 12 months for all reasons [Short-Term International Migration for England and Wales](#)

# The most popular destination for short-term migrants was London (34%) and the South East of England (15%)

Local Authority District short-term international immigration visits as a proportion of the total for England and Wales  
Using the UN definition of 3 to 12 months for employment and study, YE June 2015

# Top 10 destinations for short-term migrants\*

# Living abroad series: migration between...

- UK and the EU2
- UK and Germany
- UK and Ireland
- Britain and France
- Britain and the EU8
- Britain and Spain

Office for National Statistics Living abroad: British citizens living in the EU and EU citizens living in the UK

### Living Abroad series

The Office for National Statistics (ONS) Analytical Impact Team has been working on a series of papers which presents information on British citizens living in the EU and EU citizens living in the UK. This series has been created in response to an increased user need for data about who is most likely to be affected by the UK's decision to leave the EU.

In January 2017, ONS published an article on "How many British citizens live in Europe?". This led to further analysis being conducted using data from the 2011 round of European censuses and the latest available data from the different countries' own statistical authorities.

The papers published in this series are on migration between:

- UK and Spain
- UK and the EU8 countries
- UK and France
- UK and Ireland
- UK and Germany
- UK and the EU2 countries

### Data Sources

The data was collated with collaboration from multiple sources:

- NISRA
- Insee
- Department for Work & Pensions
- Office for National Statistics
- International Passenger Survey
- INe
- Instituto Nacional de Estadística
- Asiatische Statistik
- Central Statistical Office

Source: Eurostat

### How many British citizens are living in the EU and EU citizens living in the UK?

**British Citizens living in the EU**

- 784,900 British citizens live in the EU, excluding the UK and Ireland on 1<sup>st</sup> January 2017
- 69% of British citizens living in the EU lived in Spain, France or Germany in 2017

**EU Citizens Living in the UK**

- An estimated 2,884,600 citizens from EU countries, not including citizens of Ireland or the UK, were living in the UK between January 2014 and December 2016
- 116,000 Spanish citizens were living in the UK; around half of these were aged 20 to 39 years
- 1.3 million EU8 citizens were living in the UK. The biggest component of this is Polish citizens estimated at 814,700
- 134,800 French citizens were living in the UK; more than half of these were aged 25 to 44 years

Estimates of the number of British citizens living in the EU, by country, 2017

Country	Thousands
Spain	~280
France	~150
Germany	~100
Netherlands	~50
Other EU countries	~100

Source: Eurostat, European Labour Force Survey 2017

### Migrant characteristics

The papers present a range of socio-demographic characteristics of the migrant population such as: age-sex distribution, employment, occupation and UK State Pensions claimed.

**Population pyramids**

The population pyramids below show a large difference in the age profile of UK citizens resident in France and Spain compared with French and Spanish citizens resident in the UK. More UK citizens living in France and Spain are aged 60 and over compared with French and Spanish citizens living in the UK who are predominately of working age (15 to 64 years), particularly for France.

**Employment rates of EU citizens**

The employment rate (number of people in employment as a percentage of the population in that age group) of all nationalities living in the UK was 73%. The employment rate was 59% for Spanish citizens, 76% for German citizens, 78% for French citizens, 79% for EU2 citizens, 80% for EU8 citizens and 73% for Irish born people living in the UK.

**UK State Pensions Claimed Abroad**

Data from the Department of Work and Pensions (DWP) shows more pensions being received abroad as more people, over the age of 65, choose to retire outside of the UK. This trend is particularly evident for Spain with an estimated 108,400 UK State Pensions received in Spain in November 2016.

### Where we made impact

The Living Abroad series has generated impact across public policy, media outlets and encouraged engagement with our stakeholders and customers.

**Stakeholder Engagement/Policy Impact**

Our article, "What information is there on British migrants living in Europe?" (January 2017), was used in HM Government's White Paper 'The United Kingdom's exit from and new partnership with the European Union'.

**Social Media**

The series was promoted across our social media platforms and encouraged engagement. Tweets promoting the papers received an unprecedented response with approximately 380 retweets, 40 replies and 90 quote tweets in reply to our posts.

**Press**

The series has attracted the attention of many UK and European news outlets, with headlines appearing in papers such as The Gibraltar Olive, The Polish Express and Latvia's Sputnik.

### Future Projects on understanding the impact of migration on industries

We regularly review our future projects. If you have a suggestion for a future topic we would be very pleased to receive it at [pop.info@ons.gov.uk](mailto:pop.info@ons.gov.uk)

# International student migration research

# What we knew about international student migration from official estimates

- International students contribute around a quarter of total immigration to the UK
- The International Passenger Survey (IPS) is used to estimate migration flows
- In the year ending March 2017- total immigration for study was 139,000 and emigration of former students was 59,000, leaving a “gap” of 80,000

# What we now know – Exit Checks analysis

Outcomes for non-EU students with a visa expiry date between 8 April 2015 and 7 April 2016

Source: Office for National Statistics analysis of Exit Checks data

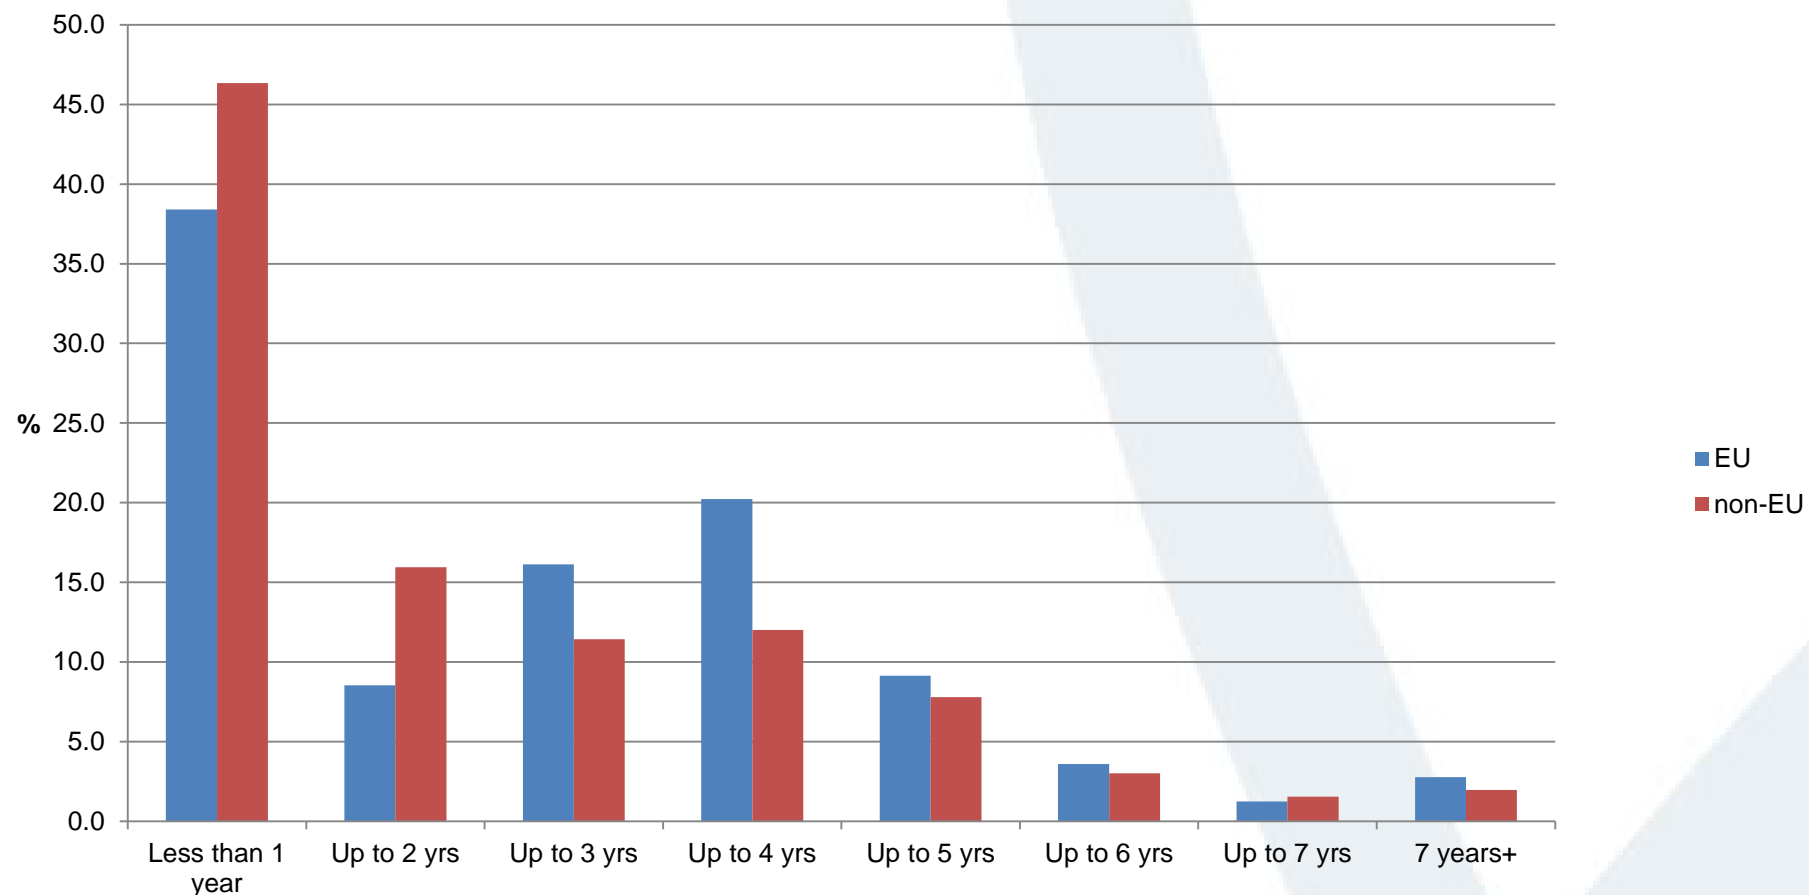

- Recent publications include:
  - [“What’s happening with international student migration?”](#) – ONS
  - [“International student migration update”](#)- ONS
  - [“Second report on statistics being collected under the exit checks programme”](#)- Home Office
- ONS’ analysis of Home Office Exit Checks data revealed that majority (90%) of non-EU international students either depart the UK before their visa expires, or extend their leave to remain
- Our analysis suggests the IPS is underestimating long-term non-EU student emigration figures

# New survey: Survey of Graduating International Students

---

- Collaborative online survey of final year non-UK students at UK Higher Education institutions
- 55 institutions, 3,000 completed surveys
- Fieldwork from 13 March to 30 April 2017
- Targeted at all levels of study (UG, PG, PhD) and all study subjects
- Questions about intentions after graduation, travel patterns during holidays, work and study

# International students: total length of time in UK

## EU students:

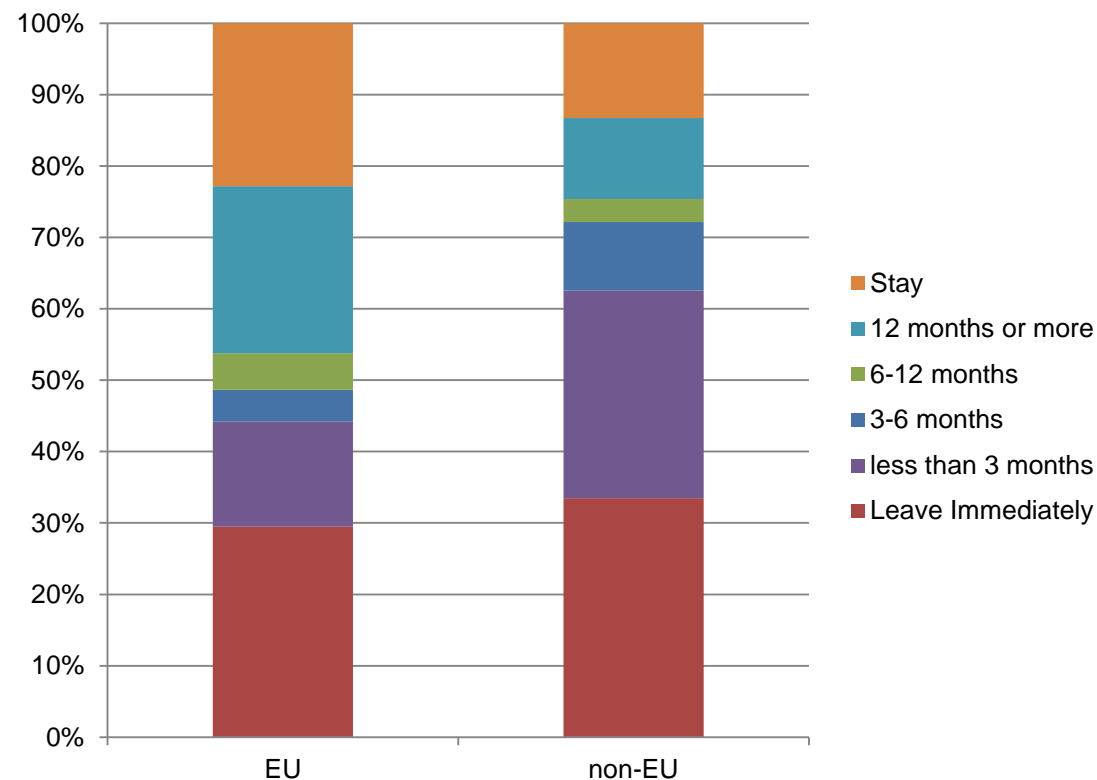

- Avg stay 2 years 5 months
- 38% living in UK for less than 1 year
- 9% living in UK for up to 5 years

## Non-EU students:

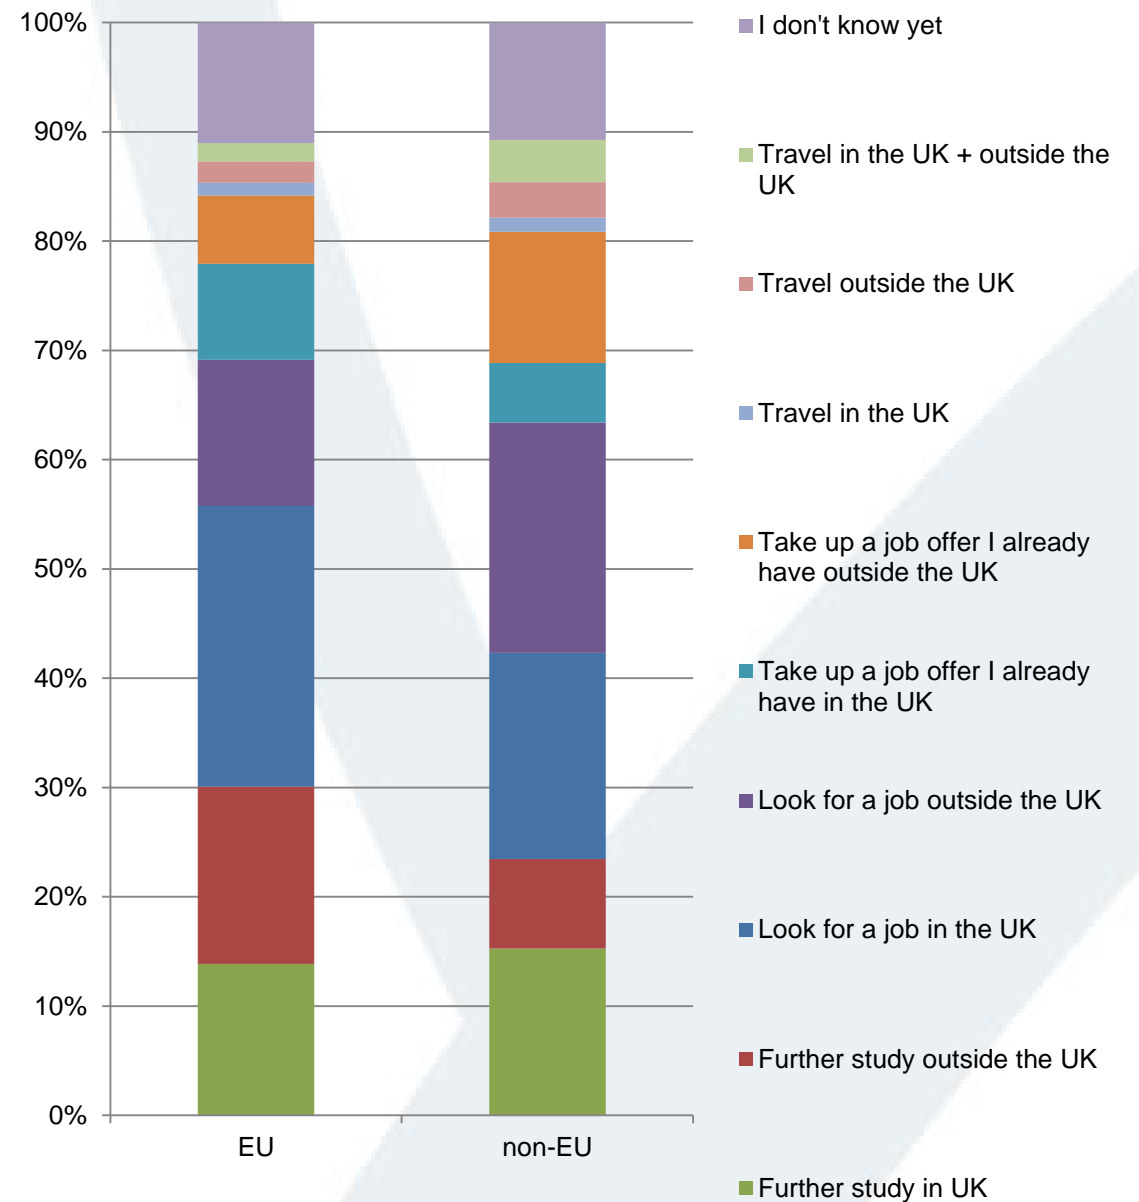

- Avg stay 1 year 11 months
- 47% living in UK for less than 1 year
- 8% living in UK for up to 5 years

# International students: post-study plans

After finishing your current course of study, how long are you planning to stay in the UK?

After finishing your current course of study, what are you planning to do?

EU students are more likely to plan to stay in the UK to look for work or for further study compared to non-EU students

# International students: certainty of post-study plans

Source: Survey of Graduating International Students, ONS 2017

- Students planning to leave immediately or within 3 months of completing their studies were more certain than those planning to stay for longer than 3 months but less than a year
- This effect was exaggerated for EU students compared to non-EU students

# Access to Survey for Graduating International Students data

---

- The survey data are available via the ONS Secure Research Service (SRS)
- Accessible to approved researchers
- To access, please e-mail:  
[migrationanalysis@ons.gov.uk](mailto:migrationanalysis@ons.gov.uk)

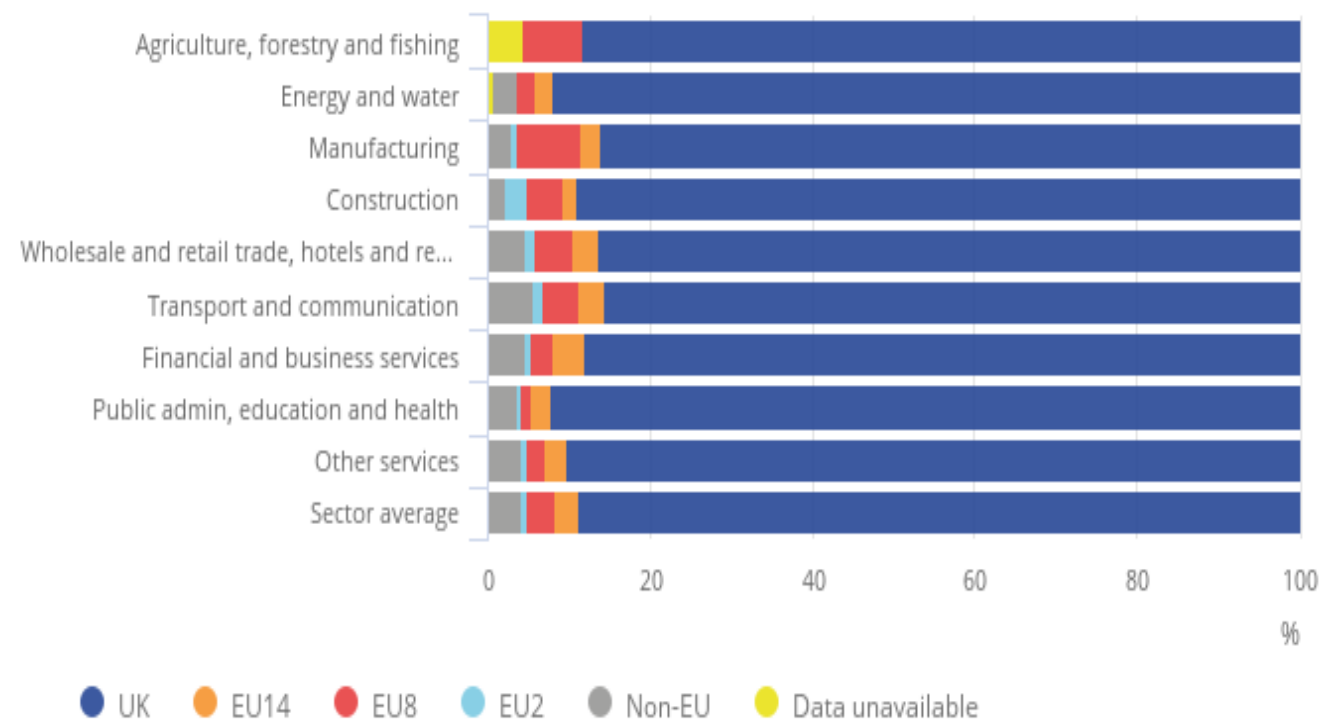

Office for  
National Statistics

# Impact of Migration

# What is the Impact of International Migration on the Labour Market?

- In 2016, 11% of the UK labour market were non-UK nationals (7% EU, 4% non-EU)
- Non-UK nationals are more likely to be overqualified for their jobs than UK nationals (37% of non-UK nationals compared with 15% of UK nationals)
- Non-UK nationals from some groups, particularly EU2 and EU8 countries, work more hours per week than UK nationals (50% of EU2 nationals and 61% of EU8 nationals vs 31% of UK nationals work more than 40 hours per week)

Distribution of workers in each nationality group by industry sector, UK, 2016

Source: Annual Population Survey, Office for National Statistics

# What is the impact of International Migration on Housing?

- England's resident population increased by 11% between 2001 and 2015, from 49.4 million to 54.8 million, with variations by region
- There has also been a 2% increase in the number of households between 2011-2015
- Recent migrants to the UK are more likely to live in the private rented sector than live in social housing or own their own home

Estimated population of UK, EU and non-EU born residents privately renting by region in England, 2016

Source: Annual Population Survey, Office for National Statistics

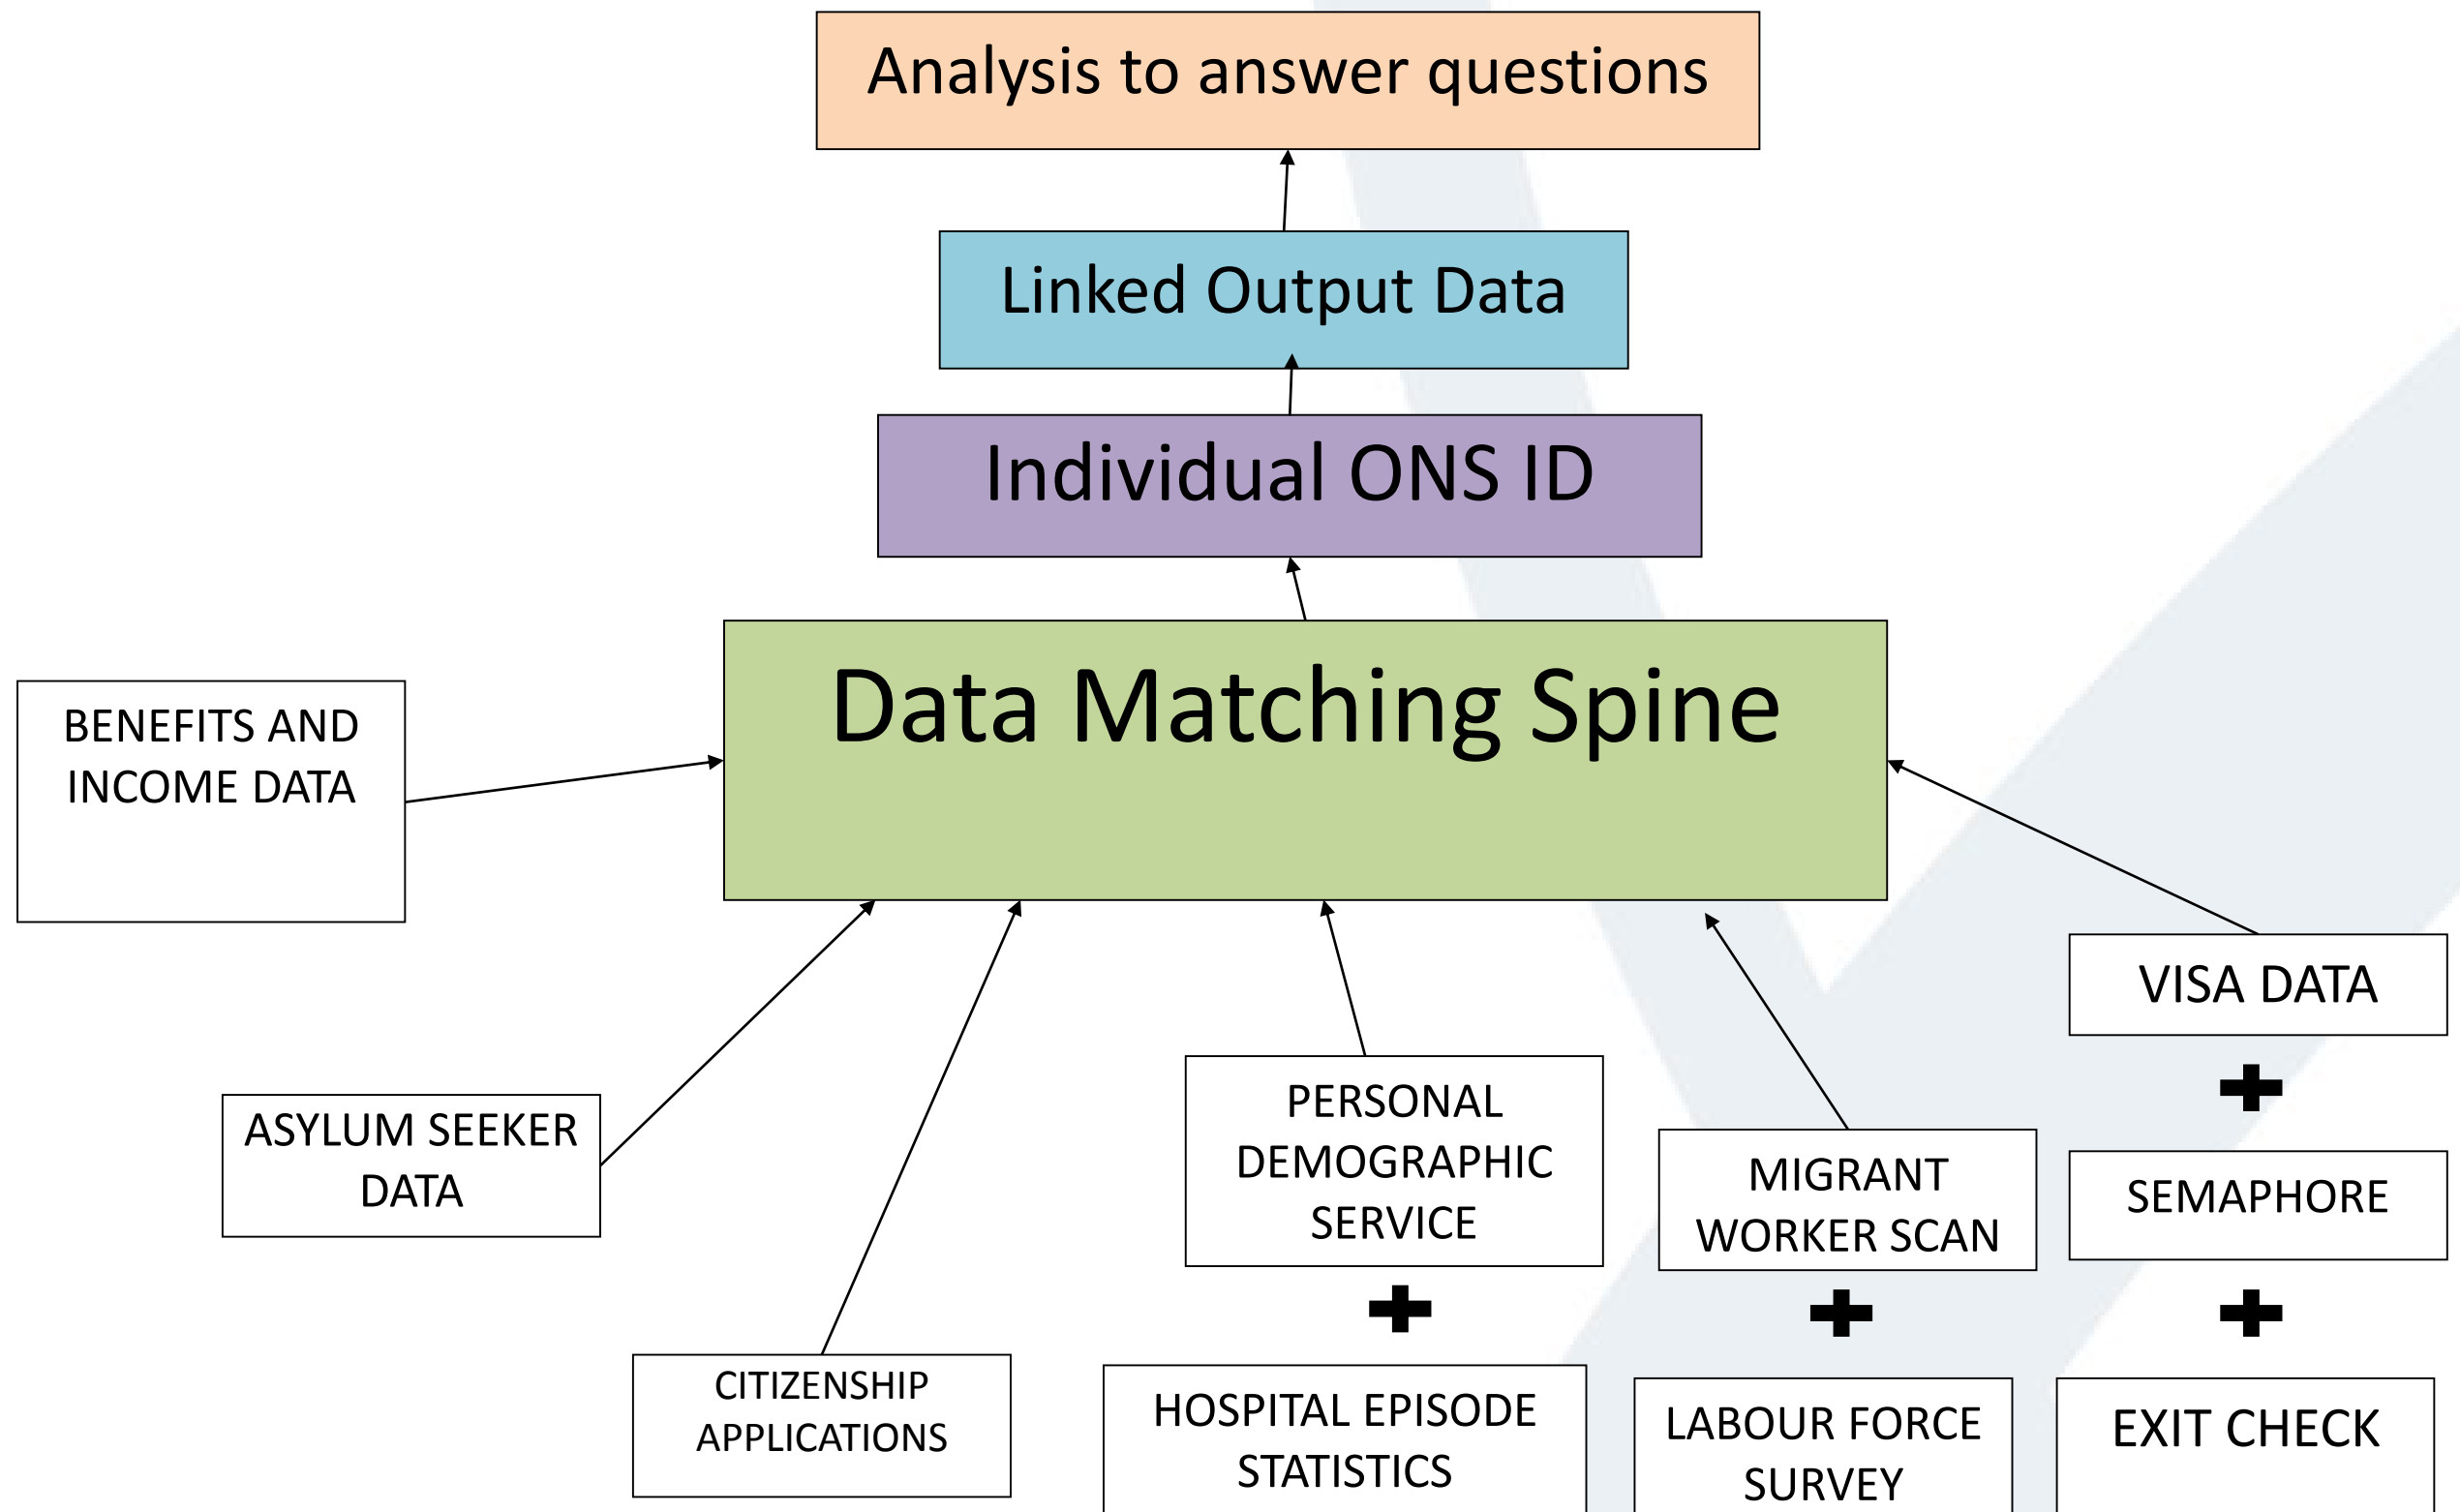

# **Future plans – improving international migration statistics**

# **Our ambition is to put administrative sources at the core of evidence on migration in 2019**

---

- Migrants interact with government in lots of different ways, giving us a great opportunity for change
- The Digital Economy Act (DEA) provides us a way to access these data and crucially link them together
- Within the Government Statistical Service we have great expertise to build a collaborative approach to using this administrative data, to answer policy questions
- Building on the Integrated Data Infrastructure work pioneered by Stats New Zealand

# Proposed data matching model once complete (by end of 2019)

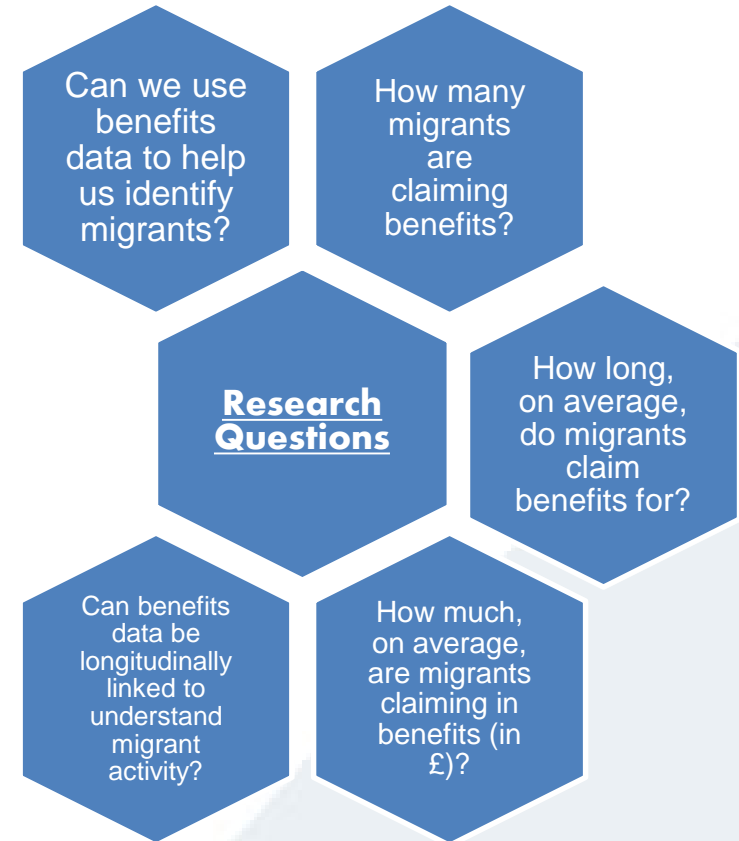

# Understanding the impact of migration using linked benefits data

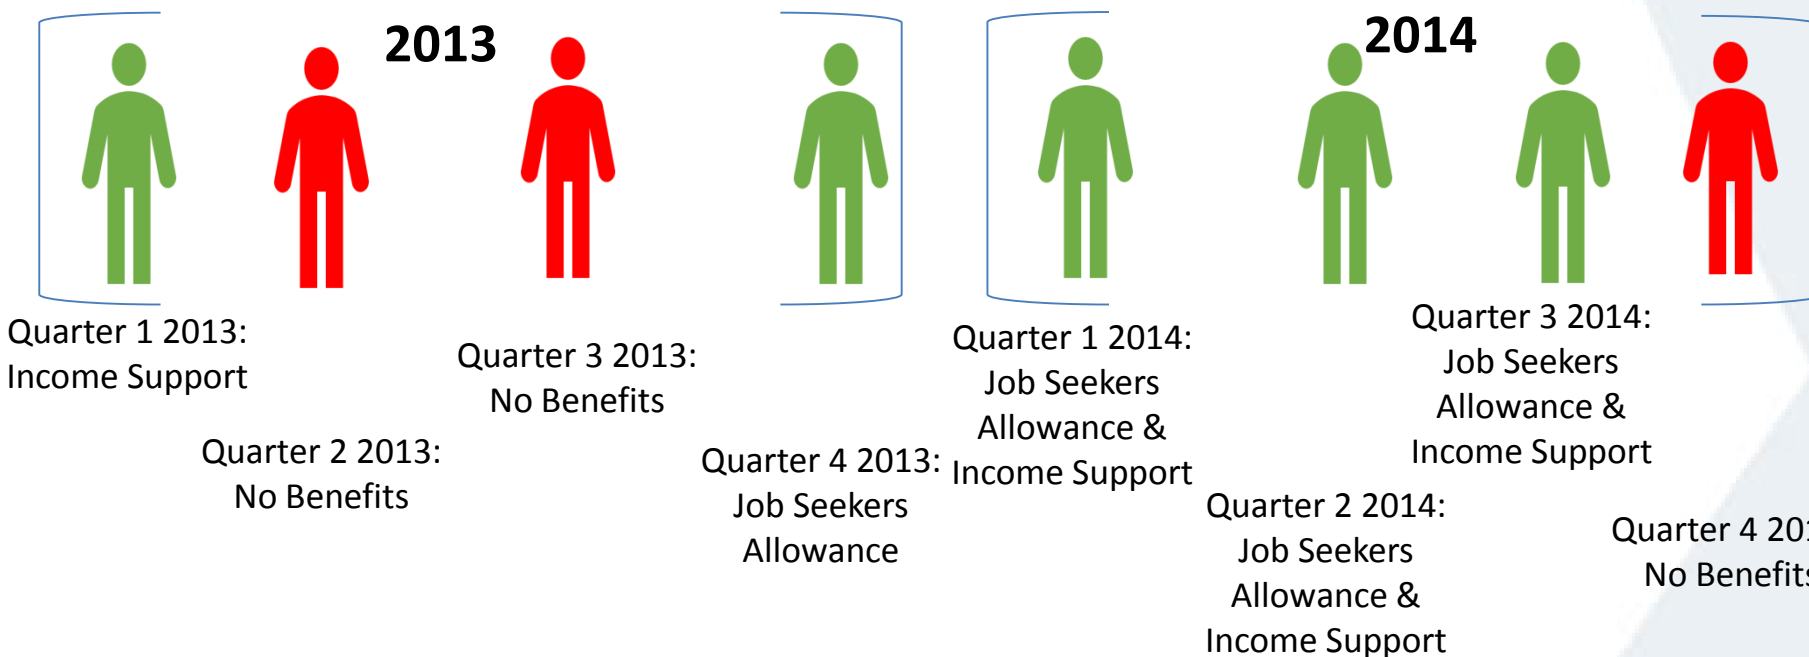

Non-UK Nationals with UK NINo's Claiming Benefits  
2014-2015: Fictional Nationality Breakdown

\*BOT = British Overseas Territories  
\*\*Unknown = Stateless or Nationality Not Recorded

## Identifying International Migrant Journeys using Longitudinal Linked Data

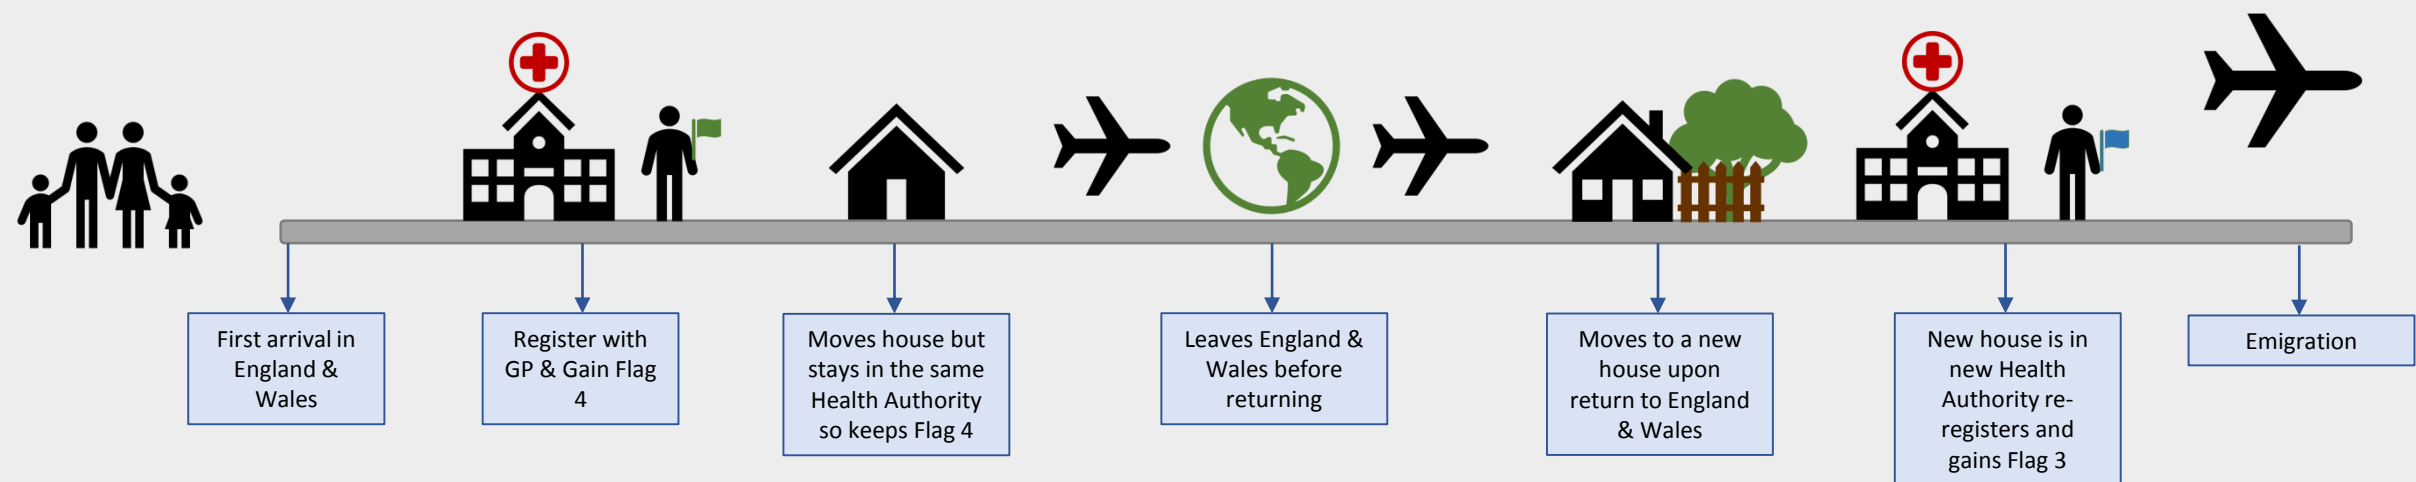

## Benefits Included in Analysis:

- Attendance Allowance
- Bereavement Benefit
- Disability Living Allowance
- Employment Support Allowance
- Incapacity Benefit
- Carers Allowance
- Income Support
- Jobseekers Allowance
- Pension Credit
- Passported Incapacity Benefit
- Retirement/State Pension
- Severe Disablement Benefit
- Widows Benefit

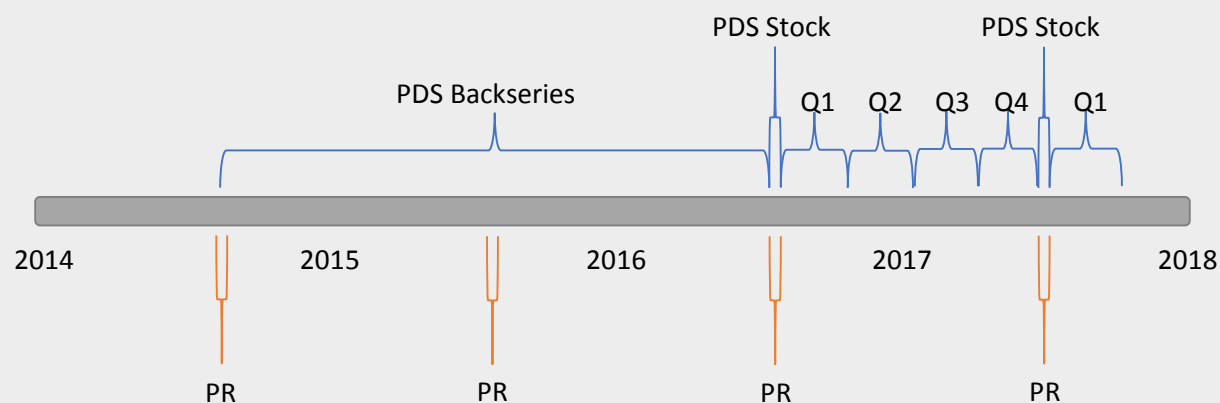

# Identifying migrant journeys using patient registration data

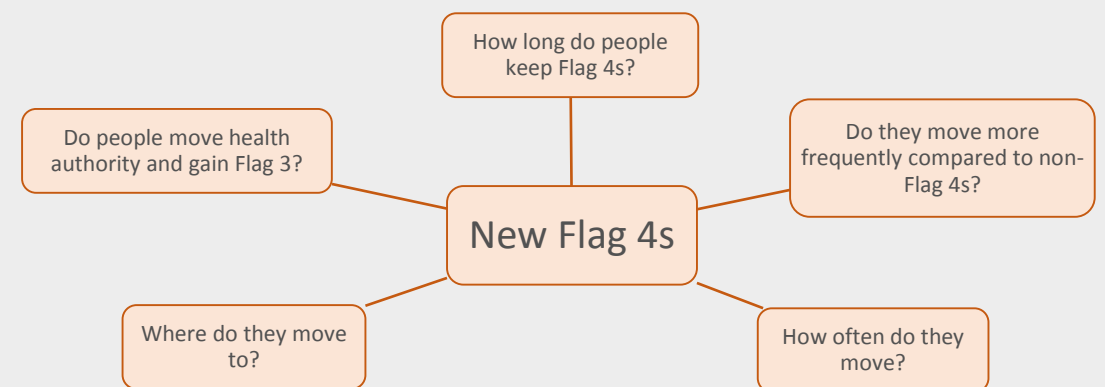

Health data contains registration flags generated when people register with a new GP. One of these (Flag 4) denotes that the person has not previously had contact with the NHS and has come from abroad – So we use this as a proxy for international migration.

## Linkage

## Cohort Analysis

- PR – Patient Register, ONS traditional source of patient records, taken as a snapshot once per year.
- PDS – Patient Demographic Service – A new more powerful linked data set, with more frequent updates.

# Reviewing current methods: Switchers

- Estimates of migration from the IPS are based on intentions, rather than actual behaviour. The Long-Term International Migration estimates are adjusted to take into account 'Switchers'
- Switchers are people whose actual behaviour does not match their original intentions

	From	To	Intentions	Actual
Inflow visitor switcher			Less than 12 months = visitor	12 months or more = migrant
Outflow visitor switcher			Less than 12 months = visitor	12 months or more = migrant
Inflow migrant switcher			12 months or more = migrant	Less than 12 months = visitor
Outflow migrant switcher			12 months or more = migrant	Less than 12 months = visitor

- The methodology for adjusting IPS estimates to account for switchers is currently being reviewed
