Interactive Kiosk

PRISM

PRISM

17" Touchscreen Kiosk

- Multi point locking system with security locks
- Designed to permanently house a 17" steel chassis monitor
- Forced fan cooling and mains expansion facility
- Front door branding opportunity and screen printing

PRISM is a highly secure and flexible interactive touchscreen kiosk specifically designed for public access applications.

Housing a 17" touchscreen monitor, PRISM is primarily constructed from steel to give it the robustness, reliability and longevity required for all kinds of public environments.

A multi-point locking system provides the essential security, and where the optional coin and note handling facilities are fitted, these are provided with dual locking enclosures for cash storage and retrieval.

PRISM benefits from forced fan cooling with coated polyester filters protecting the system from dirt and ingress.

Blue Chip Technology's own dedicated kiosk controller provides a stable and rugged PC platform with continuity of supply.

There are a host of options to allow PRISM to meet many different application requirements. These include printer options, card reader, stereo speakers, coin and note handling and keyboard options. PRISM can also be supplied with video conferencing facilities and if necessary an adjustable leveling system.

The complete system which is manufactured under the strict procedures of ISO9001, is fully CE marked, meets Health and Safety legislation and is year 2000 compliant.

Blue Chip Technology's customisation services provides customers with branding options with choice of colour and finish.

- Retention bracket for a Multimedia PC
- Blue Chip Technology dedicated Kiosk controller
- Earth wiring and PAT testing
- Fully CE Marked
- Year 2000 compliant
- Designed and Manufactured to ISO 9001

TECHNICAL SPECIFICATION

EMC
Compliant with EN55022
(Emissions IT equipment) and
EN50082-1 (Immunity Generic)

SAFETY
Compliant with BS EN60950
(Safety of IT equipment)

CONSTRUCTION
Zintec steel prime construction
material
All materials HSE tested
All materials meet minimum
flammability legislation

FILTERS
Constructed from coated polyester
30 PPI porosity
Filter flammability rated to UL94

TEMPERATURE
0°C to 40°C   Operational temp
-4°C to 40°C Storage temp

RELATIVE HUMIDITY
10% to 80% Non-condensing for
operational
10% to 90% Non-condensing for
storage

CE

YEAR 2000
Compliance
