

WIM - SUPPLIER QUESTIONNAIRE

Please use a separate form for each system

A: WIM- EQUIPMENT

(1) name of product

.....
.....
.....

... fixed unit

.. mobile unit

(2) distributor / supplier

- address (headquarter)

.....
.....
.....

- representative in Austria

... yes

address

.....
.....

... no

(3) details about the vehicle registration- and weighing unit

- typ of weighing sensor (e.g. piezopolymer sensor, weighing scale, ...)

.....
.....
.....

- physical measurement principle of the weighing sensor (short description)

.....
.....
.....

- manufacturer of the weighing sensor

.....
.....
.....

- method of the vehicle registration and -distinction (e.g. electromagnetic loops, ...)

.....
.....
.....

(4) electronic registration and -software

- electronic for registration (short description)

.....
.....

- software version

.....
.....

- possibility of data transfer via phone line

... yes .. no

B: WIM INSTALLATION AND OPERATION

(5) installation of the complete system in Austria would take place

- ... by the supplier
- ... by another contractor

address:

.....
.....

- ... no details available at the moment

(6) periodic service / maintenance and calibration of the system in Austria could be carried out

... by the supplier

... by another contractor

address:
.....
.....

... no details available at the moment

(7) special requests to the site infrastructure for installation and operation with data transfer by phone line (e.g. electricity, telephon, lightning conductor, ...)

.....
.....
.....
.....

(8) estimated duration for system installation and system setup on a site with existing infrastructure per system unit (in hours or days)

.....

C: EQUIPMENT COSTS

(9) estimated purchase- costs per system unit in Euro (including shipping costs to Austria)

- weighing unit (including electromagnetic loops) €
- registration unit (hardware) €
- registration software €
- data transfer unit (modem, ...) €

- total costs per system unit €

(10) estimated costs for system installation and system setup on a site with existing infrastructure in Austria per system unit in Euro

..... €

(11) estimated annual costs of periodic calibration- and routine maintenance in Austria per system unit in Euro

..... €

D: DETAILS ABOUT SERVICE AND OPERATION

(12) weighing precision and calibration

- system accuracy during permanent operation

according to european specifications (class A – E)

.....

according to other specifications (short description)

.....

.....

.....

.....

.....

no statements

- details about published test results (bibliographical reference)

.....

.....

.....

.....

.....

.....

.....

.....

- recommended calibration interval (in month or years)

.....

- short description of the recommended calibration

.....
.....
.....
.....
.....
.....
.....
.....
.....
.....
.....
.....
.....
.....

(13) other recommendations for routine service- works (e.g. bevor or after winter service) or special advices for operation

.....
.....
.....
.....
.....
.....
.....
.....
.....
.....
.....
.....
.....
.....
.....
.....

Finally, please provide some personal information in case we have some additional questions to your answers in the questionnaire:

Name:

Affiliation:

Address:.....

Phone:.....

e-mail:.....

Thank you for your efforts to complete this questionnaire. For any questions please contact Dr. Blab by phone or e-mail. Please return the questionnaire until Mai, 4th 2001 per Fax or e-mail.

Any further available technical information (brochure, folder, publications) about the WIM system is highly appreciated. Please send it to the contact address given below.
