

## **Professorship in Tectonics**

**School of Earth and Environmental Sciences (SEES)**

**Seoul National University, Korea**

The School of Earth and Environmental Sciences (SEES) at Seoul National University has an immediate opening for a professorship in tectonics. This position is a part of the special program implemented by the Korean government to invite and hire world's leading scientists in selected fields of science to boost the basic science research in Korea. There are currently forty-one full-time faculty members and ca. 200 graduate students in the SEES. The salary will vary depending on the qualification and experience of the applicants, and ranges from approximately \$50,000 to 75,000 U.S. per year.

The successful candidate is expected to conduct vigorous research on selected fields of tectonics, possibly in collaboration with the faculty member in the SEES, and teach one or two graduate courses per semester in English. Of particular interest are the individuals who have outstanding publication records, preferably dealing with tectonics-related problems in metamorphic terranes. This appointment will be made from assistant to full professor's rank, depending on the candidate's experience and research record, and may start from September 1, 2002. Initial appointment will be for one year, but renewable up to the maximum of three years. In addition, this position can be converted into a tenure-track professorship.

Review of applications will begin immediately and continue to the end of this year or until the position is filled. First-round review will be given to the applications received by August 10, 2002. Applicants should send a curriculum vitae, three letters of reference, and a statement of research and teaching interest to: Professor Dong-Kyou Lee, Head, School of Earth and Environmental Sciences, College of Natural Sciences, Seoul National University, Seoul 151-742 Korea (Phone, +82-2-880-6716; Fax, +82-2-871-3269; e-mail, [dklee@snu.ac.kr](mailto:dklee@snu.ac.kr)). It is perfectly acceptable to send the application materials by e-mail. Further information on the School of Earth and Environmental Sciences may be obtained from <http://sees.snu.ac.kr>.
