IMUG 2003 goes to the Netherlands

International Conference on Application of Integrated Modelling

IMUG 2003

NEW!

Panel discussion
5th/6th Framework initiatives!

SECOND ANNOUNCEMENT

IMUG 2003 goes to the Netherlands!

International Conference on Application of Integrated Modelling

WHAT IS IMUG?

IMUG, the Integrated Modelling Users Group, is an international organisation of professional users in the field of integrated water planning and management.

The purpose is to provide a transnational platform to facilitate in an open and independent way the exchange and dissemination of information on integrated wastewater planning and management methodologies, associated products and services between users and relevant organisations.

Over 17 countries in and outside Europe are involved in IMUG.

Patrick Swartenbroekx
Chairman IMUG

IMUG 2003 : WHAT IS IT ABOUT?

More than ever IMUG 2003 is the place to be for the national users groups and all other practitioners in the field of water planning and management methodologies, associated products and services.

Pragmatic comprehensible, cost-effective and high quality selected real life cases will be demonstrated and discussed. Existing networks will be enforced and, new networks will be set up in a truly international business environment, which is finally what "water" is all about. We hope to continue the success of IMUG Brussels (Belgium 1998) and IMUG Prague (Czech Republic 2000) with IMUG Tilburg (Netherlands 2003).
BE THERE !

The general aim of the IMUG 2003-programme is to give all participants "a practical and user point of view" about Integrated Modelling in relation to "best available technologies, methodologies and stakeholder perception".

During IMUG-2003, two (serial) tracks will be followed to achieve this objective :

a. Presentation on nine national real life cases on Integrated Modelling aspects

b. A full panel discussion between practitioners and invited group leaders on ongoing and / or proposed 5th / 6th framework initiatives with respect to Integrated Modelling.

TENTATIVE PROGRAMME

Wednesday 23 April

- Registration and reception

Thursday 24 April

Morning

- Welcome by representative of European Commission
- Keynote speaker : P. Harremoës
- Invited paper on Integrated Modelling (real life cases) : Greece, Italy, Germany, Netherlands

Afternoon

- European panel discussion on ongoing / proposed 5th / 6th Framework initiatives.

Friday 25 April

Morning

- Invited paper on Integrated Modelling (real life cases) : USA, New-Zealand, Czech Republic, Norway, Rumania, UK

Afternoon

- Demonstration soft- / hardware suppliers

IMPORTANT !

Call for interest :

Project / group leaders / organisations / etc. who are interested to inform the European forum with their 5th/6th Framework initiatives are invited to send an e-mail to patrick.swartenbroekx@aquafin.be
More information can then be provided.
