Announcement and Call for Papers

Objective & Scope

The Center for Intelligent Systems Research (CISR) of The George Washington University (GWU) in collaboration with several agencies of the US Department of Transportation, and industrial partners are organizing this unique conference to focus on safety and security aspects of Intelligent Transportation Systems. The objective of this conference is to provide researchers, students, developers, engineers, managers, and decision makers from government, academia, and industry a dedicated forum for exchange of the latest information, findings, and advances of intelligent systems and other automation, controls, and communications technologies for Transportation Safety and Security.

Innovative methods, technologies, tools, demonstration projects, case studies, and applications which address various safety and security aspects of transportation systems, the infrastructure, and its components are covered. Authors with original contributions are invited to submit an abstract for review. Upon acceptance, a complete paper for review and publication in the conference proceedings (CD) will be required.

Topic Areas

- Traffic Monitoring, Control, and Management
