

# Tactile Graphics 2005

1–2 December 2005

Jurys Inn, Birmingham, UK

The third international conference on  
tactile diagrams, maps and pictures

Touching on  
every aspect of  
tactile graphics

Hosted by

RNIB National Centre for Tactile Diagrams

The third international two-day conference and exhibition on tactile diagrams, maps and pictures is a special event which will bring together everyone involved in the design, production, procurement, use and support of tactile graphics.

Tactile graphics are images which are touched rather than looked at. This exciting event, which also offers pre-conference workshops, covers all aspects of tactile graphics for blind and partially sighted children and adults in education, work and life activities.

Presentation topics will include: all types of tactile graphics solutions, applications and good practice, technologies for producing tactile graphics, tactile graphic literacy, training and perception.
