## Research with Children and Youth Exploring Key Ethical Issues

Thursday 29th September 2005  
Kelvin Conference Centre

*the*  
**Glasgow Centre**  
*for the*  
**Child & Society**

## The event

This one-day event provides a forum for discussion, reflection and sharing of ideas and experiences across the diverse range of ethical considerations that arise when doing research with children and young people.

The Glasgow Centre for the Child and Society at the University of Glasgow has recently drawn up a set of ethical guidelines for researchers working with or for children and young people. This reflected discussions in the Centre about the importance of ethics in children's research and the need to encourage dialogue, discussion and debate in this area.

## Who should attend this event

The event will be multidisciplinary, and participation is encouraged from practitioners, policy makers and academics who work with or for children and young people.

This event will provide opportunities to:

- Engage with and reflect upon important ideas about ethics, children and research
- Participate in a critical dialogue about the key ethical considerations arising in doing research with or for children and young people
- Reflect upon sensitive issues arising at various stages of the research process
