

Environmental Control Equipment Short Course

Monday 23rd April 2007

**National Centre for Training and Education in
Prosthetics and Orthotics
University of Strathclyde
Glasgow**

Environmental Control Equipment is a form of specialised Electronic Assistive Technology that can enable people with special needs to control electronic devices within the home.

The course will present an overview of current service provision in Scotland, discussing the principles of the equipment, appropriate assessment and prescription. Issues relating to support of clients, integration with other Electronic Assistive Technology and the implications of current developments within the field discussed.

NHS (UK) Employees £50
Other Registrants £127
