Cost: FREE - But 1st come first seated - limited seating.

Register: <http://www.Trainerspod.com/register>

All webinar attendees will have the opportunity to win a 128 MB USB Flash Drive to be given away during the presentation.

Event Background

There is a growing demand in business and education for versatile tools at a reasonable cost. To meet that demand, many companies and educational institutions are turning to open-source software. This webinar will explore how open-source software can be integrated into an organization's learning or knowledge management systems.

The Interactive Online Classroom uses an open-source application, Moodle, to host the courses that it offers to schools and businesses around the world. The speaker also uses open source applications for blogs, discussion boards and other knowledge management applications.

In this event you learn about some of the types of open source software which are available, advantages of using open-source software and ways your organization may benefit from these types of applications.

The speaker will be offering demonstrations of several popular open-source applications and discussing how the applications can be used to build or expand an e-learning or e-business practice by providing the following types of e-knowledge delivery models:

- Library models using content management applications like [Joomla](#)
- Presentation models using blog applications like [WordPress](#) or [Serendipity](#)
- Interaction models using discussion boards like [phpBB](#)
- Combination models using online classroom applications like [Moodle](#)

During this event you will:

- identify ways to incorporate open-source e-learning and e-business applications into your organization.
- see demonstrations of several popular open-source applications and how they can be used to build an e-learning or knowledge management network.
- make contacts and network with others interested or involved in e-Learning and e-Business.
- experience a live global webinar event using Elluminate
- learn about Trainerspod.com and how they are supporting e-Learning and e-business through this unique series of events

Elluminate offers synchronous online training and collaboration tools featuring high-quality VoIP, powerful presentation capabilities, and robust interactive functionalities (whiteboard, chat, video, app sharing, etc.). And with their exclusive No User Left Behind technology, everyone stays in-sync with each other and achieves the richest user experience available - regardless of platform or connection speed.

The Minumum requirements are speakers and a 56 K modem. If you wish to speak with the presenter you will also need a microphone.

About this Webinar

Jenny Watt is an Instructional Designer with Interactive Online Classroom, a provider of online courses to colleges, universities, businesses and individuals around the world. Jenny will talk about how open-source software can be used in e-Learning and e-Business and give demonstrations of several popular open-source applications.

Jenny Watt will talk about types of e-Learning and e-Knowledge strategies schools and businesses can implement using open-source applications. She will discuss what open-source applications are and advantages of using them. There is also the opportunity to ask questions and discuss the issues raised with the guest speaker.

Registration

We have limited "seats" for this event. The webinar is entirely **free** of charge and there is a huge level of interest in hearing about open-source applications. Seats will be allocated on a first come first served basis. Register for the event by visiting: <http://www.trainerspod.com/register>.

Booking closes Wed 7th June 9pm EST. Those accepted will get a link to the **virtual lecture theater**. We will keep a reserve list in case of late drop outs but we suggest you show up early on the day of the event to avoid disappointment.

Background on This Series

Trainerspod.com seeks to provide **free access** to these events to raise knowledge and awareness of the issues, practices and needs of e-Learning practitioners and researchers around the world.

Through the free provision of webinars about e-Learning and e-Business, Trainerspod.com also supports the dissemination of good practice within countries and institutions in global economies of need. We facilitate communication among emerging economies by providing access to live and asynchronous events.

Through this **free series of webinars**, **Trainerspod.com** and their sponsors **Elluminate.com** are proud to facilitate access to a wealth of knowledge, ideas and practices across around the world.
