

Warrington Borough Council

Positional Accuracy Improvement (PAI) Data Management Officer

Temporary Contract: 18 months Ref No: CHX/08/05
£22,512 - £24,000 p.a. (Subject to job evaluation)

Here in Warrington we're seeking an enthusiastic, ambitious person with a genuine love of GIS to take a lead role in updating our spatial data in line with the Ordnance Survey's PAI Programme.

You'll need meticulous attention to detail and the ability to work on your own initiative within a larger team. We expect this vital project to take 18 months to complete, allowing you plenty of opportunity to hone your skills for future career progress.

You may already be working with another Local Authority or similar corporate environment in this field and will probably have a GIS related qualification. Whichever, a working knowledge of MapInfo Professional would be ideal along with Access database expertise. A general understanding of Ordnance Survey map bases and digital spatial data will be essential and you should have knowledge of the PAI programme. You should also be a first class communicator, able to enthuse others with your passion, organised and deadline-driven.

This post is not available for jobshare.

Closing date: 28th February 2006.

Application forms and further details are available from:

Web: www.warrington.gov.uk/jobs Tel: 01925 442040 (24 hours)

Minicom: 01925 442019 (9am - 5pm weekdays)

Committed to equality at work and in our community.
