

einfalt & hydrotec GbR
Wetter + Wasser

We are looking for a

Hydrometeorologist

We expect ...

- excellent knowledge of meteorology or hydrology
- excellent programming expertise in C / C++
- good programming expertise in Fortran or IDL
- interdisciplinary team spirit
- good German language expertise (at least after six months)
- curiosity to learn about new work fields
- enthusiasm

Additionally useful would be ...

- experience in radar meteorology
- experience with practical use of mathematical models
- further foreign languages
- and – of course – a lot more ...

We offer ...

- an unlimited position from April 2006
- projects in Germany and abroad
- clients with quite different requirements
- an innovative working climate
- competent colleagues

We ...

- are a consulting firm specialised in
 - + hydrometeorology and
 - + real-time applications in hydrology and meteorology
- are a leading company in the areas of
 - + radar rainfall data processing
 - + analysis of rainfall measurements
 - + real-time control of urban drainage systems
- keep close contact to an international network of rainfall specialists
- develop our own radar rainfall processing software (SCOUT)

Luebeck ...

- Is a UNESCO world heritage city with a medieval centre in the North of Germany
- Is close to the Baltic Sea and its beaches
- Offers many outdoor activities in its surrounding

For further information we invite you to call or email us.

Please send us your application including your salary expectations not later than end of January 2006.
