## Summer School on Multimedia Semantics '07

In 2007, the second Summer School on Multimedia Semantics will be held in Glasgow, UK, hosted by the Information Retrieval Group of the Department of Computing Science at the University of Glasgow.

### Course Topics

- Content processing, multimodal techniques, high dimensionality reduction
- Knowledge assisted multimedia mining
- Knowledge-based inference for semantic annotation
- Integration of content-based image/video analysis with natural language and speech processing
- Multimedia and the Semantic Web
- Semantic adaptation, personalisation and retrieval
- Relevance feedback for finding semantics
- Browsing large multimedia archives
- Multimedia systems and interfaces

### Who should come?

- Anyone who is interested in the area of multimedia semantics
- Postgraduate students
- Young researchers
- Practitioners from industry
- Preference will be given to people who are actively pursuing research in the field

### What to expect?

- Lectures/tutorials from leading experts in the field
- Interactive poster sessions to discuss your work and ideas
- Socialise with peers
- Experience Scottish culture and nightlife

### Important dates

**20 April 2007** – Submission of application

**30 April 2007** – Notification of participation

**31 May 2007** – Registration
