

GIS Technician

Location: Romsey, Southampton

Business: PMSS Ltd

Salary: Competitive package

PMSS is a multi-disciplinary consultancy specialising in project management, development & construction, technical & commercial advice, health & safety, environmental and quality management. With extensive experience in the renewable energy sector, our teamwork approach results in efficient, well-managed delivery of projects, both internationally and in the UK.

Reporting to the Technical Services Manager the successful applicant will have responsibility for the production of GIS work for a variety of disciplines including environmental management, engineering design, and site development activities.

The successful applicant will be proficient in ESRI ArcGIS 9.2 with a willingness to develop their capabilities to include the use of specialist windfarm design software.

The successful applicant will have at least a bachelors degree in GIS, Cartography or a related subject and at least 2 years of experience in a relevant sector.

The role will be based from our Romsey office in Hampshire, but may require travel to other PMSS offices or client premises etc, throughout UK and Europe.

PMSS offer a very competitive rewards package and excellent working conditions with many supplementary benefits.

Please send your CV, a covering letter and Salary expectations to jobs@pmss.co.uk
