

The Bergen fMRI 2008 spring course:

## Imaging in Psychiatry

'Imaging in Psychiatry' is a two days course concerning the use of fMRI and related approaches to psychiatric disorders. The course is aimed at researchers and clinicians in psychiatry, psychology and related disciplines. The key speakers are

**Prof. Steve Williams**, Institute of Psychiatry, King's College, London, UK, and **Prof. Bradley Peterson**, New York State Institute of Psychiatry, Columbia University, USA, who both are internationally recognized for their contributions to the field. One purpose of this course is to discuss the clinical and technical prerequisites needed for these types of studies. In addition, the speakers will present recent findings and clinical implications of fMRI and related approaches in the evaluation of specific psychiatric disorders. Participants are invited to bring posters or research suggestions in order to discuss own projects during the course.

The language of the course is English.
