Post-doctoral grants announcement

GEODESY/SEISMOLOGY

The Centre of Volcanology and Geological Risks Assessment (CVARG) from the Azores University, Azores islands, Portugal, through the Azores Regional Government, has an open call for 3 post-doctoral positions with the following titles:

[Announcement FRCT/2008/112/016 - CVARG - Geodesy](#)

Grant title – “Application of geodesy techniques to the monitoring of seismovolcanic and hydrothermal systems”

Responsible scientist: Teresa Ferreira – Teresa.JL.Ferreira@azores.gov.pt

[Announcement FRCT/2008/112/017 - CVARG - Seismology](#)

Grant title - “Development and implementation of early warning systems based on automatic estimation of seismic source parameters”

Responsible scientist: Teresa Ferreira – Teresa.JL.Ferreira@azores.gov.pt

[Announcement FRCT/2008/112/019 - CVARG - Seismology](#)

Grant title - “Broadband seismic network operational improvement through automatic seismic waveform recognition by pattern matching and spectral decomposition”

Responsible scientist: Nicolau Wallenstein – Nicolau.MB.Wallenstein@azores.gov.pt

The call is open until April 15th 2008.

How to apply: Interested candidates should look for details about application procedures, grant conditions, candidate profiles and projects to develop at the Internet site <http://sctridi.azores.gov.pt>. The applications should be formalized through the electronic submission of the form made available in this same website.

For additional details on each grant please contact the corresponding responsible scientist.

Information about CVARG can be found at the web site: www.cvarg.azores.gov.pt.
