

Agent-based Modelling Taster Course

29th October 2008, University of Surrey

Course Instructors:

Prof. Nigel Gilbert
Dr Edmund Chattoe-Brown
Dr Corinna Elsenbroich

Time: 9:30am - 4:30pm, 29 Oct 2008

Venue: Department of Sociology
University of Surrey
Guildford GU2 7XH

Registration:

Please download the registration form from:
<http://cress.soc.surrey.ac.uk/Simian>

Entry Level:

No prior knowledge required

Course Description:

Computational modelling is a new method for the social sciences, combining many of the advantages of quantitative and qualitative approaches. It also has distinctive benefits of its own.

This course is appropriate for researchers and other professionals, from any discipline, who would like to apply mixed methods or use an innovative method for their research into complex social systems. The taster course will show you what computational modelling can do.
