

3rd Structural Biology Workshop: Structural Virology

CIC bioGUNE, Bilbao 4-5 June 2009

1st Circular

Viruses represent a source of wonder as the miniaturized entities that permeate and cross-interact with the entire biosphere and are by far the most numerous organisms on earth. The workshop aims to offer an overview of the field by gathering international and national speakers with some of the most recent and exciting developments in structural virology.

Invited Speakers

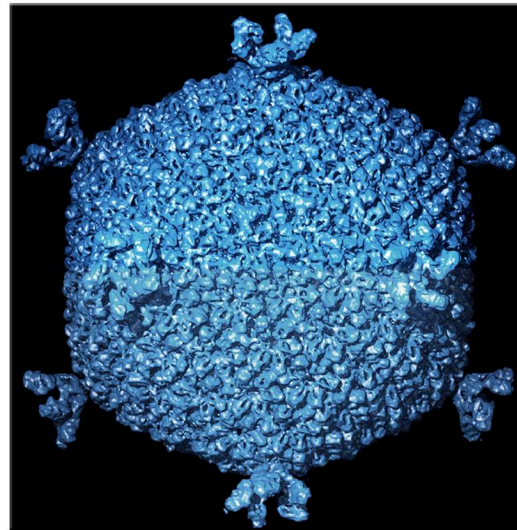

Alasdair Steven
(NIAMS, USA)

Ignacio Fita
(CSIC-IRB, Spain)

Dennis Bamford
(University of Helsinki, Finland)

Mauricio G. Mateu
(CSIC-UAM, Spain)

Francisco J. Blanco
(CIC bioGUNE, Spain)

Jonathan Grimes
(University of Oxford, UK)

Diego Guerin
(CSIC-UPV/EHU, Spain)

Carmen San Martin
(CNB, Spain)

Petr Leiman
(EPFL, Switzerland)

Nicola G. Abrescia
(CIC bioGUNE, Spain)

The workshop is limited to 35 attendees. There is no registration fee and grants covering travel expenses and accommodation are available to strongly motivated PhD students.

Details of the registration procedure and of the workshop programme will follow in the 2nd Circular.
