Background

There is a growing understanding of the complex interactions between socio-cultural, biological, political and economic influences upon infant and child feeding, eating and nutrition. This international, interdisciplinary conference is organised by the Maternal and Infant Nutrition and Nurture Unit (MAINN). MAINN is a multidisciplinary unit within the School of Public Health and Clinical Sciences, Faculty of Health and Social Care at University of Central Lancashire, UK.

The conference links closely with the international journal Maternal and Child Nutrition (Wiley-Blackwell Publishing) that has its editorial office in MAINN.

The conference will explore key themes from a range of disciplinary perspectives on infant and child feeding, eating and nutrition.

The conference aims to:

- Enhance understanding of the complex interactions between socio-cultural and biological factors in infant and child feeding, eating and nutrition.
 To explore the nature of the relationship that is engendered between
- mother and child in connection with various types of nutritive and nurturing behaviour.
- · To increase understandings of breastfeeding as a bio-cultural activity.
- To focus upon key strategic initiatives that may impact upon practices related to infant and child feeding, eating and nutrition.

Participants:

across a spectrum of disciplines including:

- Biological Scientists
- Breastfeeding Support and Advocacy GroupsDieticians

- Health Visitors
- Lactation Consultants

- Medical Doctors/Physicians
- Medical Sociologists

- Nutritionists
- Public health specialists
- Psychologists
