

The Physics Innovations Centre for Excellence (piCETL) and Dundalk Institute of Technology (DkIT) would like to invite you to the sixth annual problem-based learning Summer Workshop.

PROBLEM BASED LEARNING SUMMER WORKSHOP

13 - 15 July 2009
By University of Leicester

The Summer Workshop is suitable for anyone engaged or thinking of becoming engaged in Problem Based Learning (PBL). We welcome lecturers, tutors, course staff, and curriculum-developers, teachers, and facilitators. Although piCETL is chiefly focussed on the physical sciences, the Summer Workshop is NOT discipline-specific, and colleagues from the arts and social sciences will be welcomed alongside those from the sciences, engineering, mathematics, IT, medical and healthcare fields.

This unique residential event gives you the opportunity to discuss and develop your own PBL implementation, whether you are starting from scratch, becoming involved in an existing programme, or are looking at ways of refreshing and sustaining your present course.

The programme will consist of discussion papers, workshops, oral presentations and posters.

Intending participants are invited to submit brief abstracts of papers or posters about PBL research, practice, or plans or issues in the implementation of PBL.

Closing date for registration: 19 June 2009

Closing date for submission of brief abstracts: 29 June 2009

Abstracts should be sent to Professor Derek Raine—jdr@leicester.ac.uk

Experts and delegates will be on hand to offer advice and support throughout the three days.

The atmosphere is informal and convivial. The location this year is on the 90 acre campus of DkIT. Dundalk is situated on the coast half way between Dublin and Belfast. Come and join us to learn about and share PBL practice, and to spend some time thinking about your own implementation issues and goals.

Fees: €150 conference fee. €100 concession rate. Delegates are requested to arrange their own accommodation— Please see www.DkIT.ie/Leap.
