Session 4

- 15:30 Ecological Risk Assessments
Samantha Deacon, Environ UK
- 16:15 Questions & Discussion
- 16:20 Overview of Day by Chair person

Land Assessment and Remediation

19th June 2009, Manchester

Successful remediation of derelict and contaminated sites is only achieved by clear communication between many different practitioners from a diverse range of disciplines.

The seminar attempts to provide an overview of the development process from initial site investigation, legislative drivers, risk assessment process through to remediation. Case histories will be provided together with a hands on practical data evaluation session.

The speakers are from different backgrounds including a partner from a leading legal practice, two representatives of environmental practices, two representatives of a remediation contractor and a well known local authority officer. All of the speakers are well versed in their subject matter and will offer a valuable, lively and informative insight into their specialisms.

The event will be of particular interest to:

- Local Authority Officers
- GeoEnvironmental Consultants at all levels
- Practitioners requiring greater knowledge of legislative drivers

Land Assessment & Remediation Registration Form

Please complete the form below and return to our Regional Office in Manchester. Upon receipt of your information we will register you, send the travel directions and also send you an invoice for the seminar. The costs (see below) are dependent upon whether you work for a local authority or other organisation.

Should you require any further registration information then please email aczarnecki@vertasefli.co.uk or call Tel: 0161 437 2708.
