

Environmental Motorsport Conference

14th – 15th September 2009
International Manufacturing Centre
University of Warwick
Coventry, UK

The WorldFirst Racing Project was led by WMG and WIMRC at the University of Warwick along with a number of industrial partners including Lola Cars, Lear, Yazaki and Scott Racing. The result was the WorldFirst F3 Racing Car. The project successfully demonstrated the use of sustainable materials and fuel technologies in an extreme environment, generating huge public and media interest and establishing a network of partners striving to improve the environmental credentials of the motorsport industry.

The WorldFirst Environmental Motorsport Conference will bring together industry and academia in one place to disseminate cutting edge developments and examine how best to exploit the exciting opportunities that are appearing at the dawn of a new era in international motorsport. The conference will comprise of a networking track day with driving experiences, presentations from key industry and academic speakers and workshops that will seek ways forward for future collaborations.

The WorldFirst F3 car running at Goodwood Festival of Speed 2009, driven by Adam Carroll, A1GP Champion
