

# What sort of mother makes her child drink water like this?

WaterAid/Jeremy Harner

## One that doesn't have any choice

Clean water is something that most of us take for granted, but over a billion people in the world don't have it and over two billion people lack basic sanitation. As a result a child dies every 15 seconds from water-related diseases.

WaterAid is the UK's only major charity dedicated exclusively to the provision of safe domestic water, sanitation and hygiene education to the world's poorest people. Our projects are set up by local organisations and managed by the community so that the benefits last long in to the future.
