

Integrated Geochemical Interpretation Ltd Hallsannery, Bideford, Devon, EX39 5HE, UK.

Positions Available: Basin Modeller/Petroleum Geochemist

Company: IGI Ltd

Location: Bideford, Devon, UK

Job type: Permanent

Integrated Geochemical Interpretation Ltd. (IGI) is a petroleum geochemical consultancy based in North Devon in the southwest of England. IGI provides services for the oil & gas industry in the areas of exploration and production, with an emphasis on integrating petroleum geochemistry, geology and basin modelling.

IGI Ltd. is currently looking to fill a vacancy in either of the two following areas:

Basin Modeller

We are seeking a person with basin modelling experience to become part of a team of geochemists & basin modellers working on both single client and multi-client projects. The post is suited to an Earth Sciences graduate at Masters or Ph.D. level with a good working knowledge of petroleum geology and experience of 1-D and 2-D basin modelling. Knowledge of map-based and 3-D basin modelling is desirable, but not essential. Report writing is an important part of the post – hence a high quality of written and spoken English is essential. IGI holds permanent licences for BasinMod, PetroMod and Trinity/Genesis software.

Petroleum Geochemist

This position is for a petroleum geochemist to join the same team of geochemistry and modelling interpreters, but in addition to project work, this person would contribute to the development of geochemical databases for the industry. The post is available for a graduate in any appropriate discipline, but experience in petroleum geochemistry is essential, either through postgraduate training or employment. As report writing is an important part of the post a high quality of written and spoken English is essential. Use of IGI's p:IGI software for bulk, molecular and isotopic characterisation of oils, gases and source rocks is central to the work; training will be given.

Salary and Benefits

IGI provides a competitive salary and attractive working environment and lifestyle.

Applications

To apply, please send your CV and covering letter to Sally Cornford (sal@igilt.com) at Integrated Geochemical Interpretation Ltd., Hallsannery, Bideford, Devon, EX39 5HE, United Kingdom.
