

Vacancy • PhD Student in Soil Mechanics

A position for a PhD student is now open at the Swiss Federal Institute of Technology, Lausanne (EPFL). The proposed subject is a part of the research activities within the laboratory of soil mechanics (LMS – <http://lms.epfl.ch/en>). PhD works might be of experimental or modelling nature or both, relying on state-of-the-art laboratory equipment and computational resources. The hired PhD student will also work as a teaching assistant for the civil engineering section of EPFL.

Experience the EPFL doctoral training and motivational work conditions. EPFL is the top European university in Engineering in 2009 following the Academic Ranking of World Universities.

PhD students register to the doctoral school, gathering more than 1000 students, and benefiting from the University's extended facilities. The work environment in LMS is cosmopolitan, with a young team of researchers. PhD students are offered attractive salaries.

More on <http://lms.epfl.ch/en>

Candidates should own Engineering or Master Degree, and a strong interest in Mechanics of materials.

Suitable, highly-motivated candidates should send electronic applications (as a single PDF) to the email address below. The application file will include a cover letter describing interests and qualifications for the position and complete curriculum vitae. If selected, the candidate will have to meet the requirements of EPFL doctoral school before being hired at LMS.
