

RSC Seminar Series

2010

The RSC Seminar Series 2010 are informative half day events targeted at anyone working in a strategic or operational management role within HE or FE in the West of Scotland.

The first of the series will examine expectations of 21st century learners and explore how technologies reaching the mainstream could impact significantly on learning & teaching.

The session will be led by Joan Walker, e-Advisor for Curriculum Management. Guest contributors to the event include Christine Dudgeon from Barony College who will talk from first-hand experience about curriculum planning tools and the impact of taking a systematic approach to curriculum design. In addition we will be joined by Linn Vander-Zanden from SQA who will talk about the use of ePortfolios and other Social Software from SQA's perspective.

The event will include an opportunity to ask questions in an open Q&A session or informally while networking over lunch.
