7.30-9pm
Wellcome West Room

Places are limited
Booking essential

Prof Philip Rees, School of Geography, University of Leeds

The Dynamics of Populations Large & Small: Processes, Models and Futures, with Some Illustrations for the Scottish Population.

The **AQMeN** Inaugural Annual Lecture reviews the processes of population change, the models we use to simulate the processes and what we can say about the future. Key processes influencing most national populations are ageing driven by low or declining fertility, rising life expectancy and international migration gains and losses, creating older and more diverse populations. The Lecture will explore the social and economic consequences of population change.

The registration desk will be open from 5pm
We look forward to welcoming you
