

The Physics Innovations Centre for Excellence (piCETL) would like to invite you to the eighth annual problem-based learning Summer Workshop.

**PROBLEM BASED LEARNING
SUMMER WORKSHOP**
Experiencing PBL
12 - 14 July 2010
University of Leicester

The Summer Workshop is suitable for anyone engaged or thinking of becoming engaged in PBL. We welcome lecturers, tutors, course-, staff-, and curriculum-developers, teachers, and facilitators. Although piCETL is chiefly focussed on the physical sciences, the Summer Workshop is NOT discipline-specific, and colleagues from the arts and social sciences will be welcomed alongside those from the sciences, engineering, mathematics, and IT fields.

This unique residential event gives you the opportunity to discuss and develop your own PBL implementation, whether you are starting from scratch, becoming involved in an existing programme, or are looking at ways of refreshing and sustaining your present course.

The programme will consist of workshops, discussion papers, oral presentations and posters.

Intending participants are invited to submit brief abstracts of papers or posters about PBL research, practice, or plans or issues in the implementation of PBL.

Closing date for registration: 20 June 2010

Closing date for submission of brief abstracts: 27 June 2010

Experts and delegates will be on hand to offer advice and support throughout the three days.

The atmosphere is informal and the location, in the leafy Oadby Halls of Residence situated adjacent to the botanical gardens, is convivial. Come and join us to learn about and share PBL practice, and to spend some time developing your own implementation.

Fees: £225 including registration, accommodation, and meals. Discounts available for CETL personnel, returning delegates, and presenters. For further details and registration, visit website: <http://physics.le.ac.uk/PBLSummerSchool/> or contact Daxa Patel, University of Leicester, Tel: 0116 252 3574, Email: dp204@le.ac.uk
