Probabilistic atlases of the caudate nucleus, nucleus accumbens, putamen, thalamus, pallidum, and substantia nigra in MNI/CIBM152 stereotaxic space, based on manually drawn atlases from 30 healthy adults (the "Atlases", together the "Materials") [Release v[1.0] 2008]

All Rights Reserved

Developed jointly by: R. Laila Ahsan¹, Richard Allom¹, Ioannis S Gousias¹, Helai Habib¹, Federico E. Turkheimer¹, Samantha L. Free², Louis Lemieux², Ralph Myers³, John S. Duncan², David J. Brooks¹, Matthias J. Koepp², and Alexander Hammers^{1,2} (the "Authors")

1 Department of Clinical Neuroscience and MRC Clinical Sciences Centre, Division of Neuroscience and Mental Health, Faculty of Medicine Imperial College London; 2 Department of Clinical and Experimental Epilepsy, Institute of Neurology, University College London; 3 Hammersmith Imanet (part of General Electrics Healthcare)

In accessing the materials, documents and content, you agree to the following terms and conditions:

1. The materials, documents and content on this site ("Materials") are protected by copyright, moral rights and/or database right throughout the world and are owned by Imperial and/or the Authors. The Authors assert their moral rights to be identified as the authors of the Materials.
2. You may read, print and download the Materials for academic, non-commercial research including teaching.
3. You may use the Materials (in whole or in part) for the purposes of academic, non-commercial research and teaching ("Permitted Purpose"). For the avoidance of doubt, the Permitted Purpose does not include using Materials for (i) commercially-sponsored research or (ii) the diagnosis, treatment or medical care of patients.
4. You shall not (i) sub-licence or distribute the Materials to third parties or (ii) use the Materials (in whole or in part) as the basis of any commercial product. If you require a commercial licence for the Materials please contact Imperial's technology commercialisation company, Imperial Innovations Limited (<http://www.imperialinnovations.co.uk>).
5. You must not alter, modify, add to or delete anything from the Materials you download or use, except as is permitted in paragraphs 2 and 3 above. Subject both to the previous sentence and paragraph 6, any alterations, modifications, additions or deletions from the Materials must be clearly described in any publications or presentations.
6. You shall, in any use of the Materials, include an acknowledgement in the form of "© Copyright Imperial College of Science, Technology and Medicine 2007. All rights reserved." In addition, in all publications or presentations, you shall cite (i) the source of the Materials as "<http://www1.imperial.ac.uk/medicine/people/alexander.hammers/>" and (ii) the appropriate paper documenting the creation of the Atlases (Ahsan RL, Allom R, Gousias IS, Habib H, Turkheimer FE, Free SL, Lemieux L, Myers R, Duncan JS, Brooks DJ, Koepp MJ, **Hammers A**. Volumes, spatial extents and a probabilistic atlas of the human basal ganglia and thalamus. *Neuroimage* 2007, 38(2): 261-270. Jun 14, 2007: Epub ahead of print).
7. The Materials are being provided as a service to the academic community and on a non-commercial basis, without charge. Accordingly, to the fullest extent permitted under applicable law, Imperial accepts no liability and offers no warranties in relation to the Materials.
8. Without prejudice to the generality of the foregoing paragraph, the Materials provided under this free, academic end-user licence are a research tool undergoing further development and are not intended to be a clinical diagnostic aid. They are provided 'as is' and without any express or implied warranties, representations or undertakings. As examples, but without limiting the foregoing, Imperial does not give any warranty that the Materials do not infringe third party rights, are of merchantable or satisfactory quality, are fit for any particular purpose or for use under any specific conditions, or comply with any statement, demonstration or model provided or supplied by Imperial.
9. In no event, unless required by law or agreed to in writing, will Imperial be liable to you for damages, including any general, special, incidental or consequential damages arising out of the use or inability to use the Materials (including but not limited to loss of data, data being rendered inaccurate, losses being sustained by you or third parties), or a failure of the Materials to operate with any materials or software used by you.
10. You agree to indemnify Imperial and its officers, employees, students, other researchers and agents (together, the "Indemnitees") and hold the Indemnitees harmless from and against any and all claims, damages and liabilities asserted by third parties (including claims for negligence) which arise directly or indirectly from the use of the Materials or the sale of any products based on the Materials.
11. To maintain the protection of human subjects you undertake not to use the Materials so as to attempt in any way to discover the identity of or make contact with any individual from whom the information originated.
