## CPD Courses in Paediatric Neuropsychology

The UCL clinical paediatric neuropsychology training programme is now in its 5<sup>th</sup> year and has developed by drawing upon the wealth of neuroscientific and paediatric expertise within a range of UCL institutions and Great Ormond Street Hospital for Children. The clinical degree programme is the only BPS professionally accredited programme of its kind.

Due to significant demand we are now opening up a greater number of the degree modules to external delegates as short 5 day CPD/Taster courses as follows:

- Introduction to Developmental Cognitive Neuroscience
- Professional Issues for Paediatric Neuropsychologists
- Development of Sensory, Motor and Cognitive Neural Systems
- Developmental Disorders and Neuropsychological Profiles
- Infant and Neurodevelopmental Assessment
- Assessment of Neuropsychological Disorders and their Functional Implications
- Developing Clinical Formulations and Interventions
- Advanced Developmental Cognitive Neuroscience

*Programme Director: Dr. Peter Rankin*
