Psychologist in the Pub

**Why magic works; what it tells us about assumptions, attention,
(and why multitasking is a myth), beliefs and memory.....**

Rob Bailey (aka The 'Psychic' Psychologist)

SQ Club, Whitefriars, Coventry

Tuesday 8th November 2011 18.30- 21.00

Rob's journey from psychologist to illusionist has been fascinating and full of unexpected realisations. In order to illustrate this, Rob's presentation will first include a demonstration of some of the illusions that he performs, followed by an explanation of the psychological principles behind at least one of them. After these demonstrations, Rob will talk about what his experiences of illusions have taught him about people, science, sceptical thinking and psychology.

If you would like to learn more about Rob, his website is:
