Open Lecture Series

The TRS Model: Systems and Approaches to Facilitate Reintegration and Independence

Speakers: Transitional Rehabilitation Service Staff

Cited by the National Service Framework for Long Term Conditions' Good Practice Guide the Transitional Rehabilitation Service at Haberdashers House offers an intensive interdisciplinary rehabilitation service to clients with acquired brain injury, who are wanting to return to life in the community. This presentation explores how the unique systems and approaches developed by the service underpin our excellent outcomes, and suggests ways in which these approaches may be adapted by less specialised services to meet the needs of clients at this stage in the rehabilitation pathway.

Thursday 1st March 2012, 4.30-5.30pm

De Lancey Lowe Room

Royal Hospital for Neuro-disability

Free lecture open to everyone, but please contact Phil Denning on **020 8780 4500 x5140** or email institute@rhn.org.uk if you plan to attend as places are limited.
