

Knit One For Worcester

The pattern below is a really easy pattern to knit once you have the basics of knit, purl & yarning over. You don't have to use this pattern for your leaf and there are lots of other great patterns you could use if you would prefer. The other good thing about this pattern is that you can use any size of knitting needles and any colour of wool.

Abbreviations & Instructions

k1 = Knit 1 stitch (or however many the pattern indicates)

p1 = Purl 1 stitch (or however many the pattern indicates)

k2tog = knit 2 stitches together (or however many the pattern indicates)

p2tog = purl 2 stitches together (or however many the pattern indicates)

yo = Yarn Over. This is not complicated at all. All you do is wrap the working yarn (the one from the ball of wool) around the right hand needle (left hand if you're left handed) to create another stitch. Then you just carry on knitting and forget about it.

sl2, k1, p2sso = Don't panic! This isn't as complicated as it looks. All you do is slip two stitches off the left hand needle onto the right hand one (other way round if you're left handed). You then knit the next stitch. Finally, take the two stitches you slipped off the needle and hook them over the stitch you've just knitted one at a time. It can be a little fiddly if you're doing it for the first time but once you've practiced a few times you will find it easy peasy!
