

CALL FOR POSTERS

The Doctoral Midwifery Research Society welcomes poster presentations from individuals, organizations and learned bodies that wish to share research data on new and emerging evidence related to maternal and child health.

As a poster presentation is a visual display of information and therefore constitutes an interactive medium, authors are encouraged to pay particular attention to the content and design of their presented work.

Posters that report empirical studies should outline the research process, including:

- a. Background
- b. Aim
- c. Method (including ethical approval)
- d. Results
- e. Discussion
- f. Conclusion
- g. References (Max 10) and Logos for any sponsorship

Details of Source of Funding related directly to the presented material should also be included.

Preferably posters should be portrait rather than landscape; and NOT exceed 1metre in size.
