

# Data mining with iPlant

17-20 September 2013  
University of Warwick

## Day 1: Introduction to iPlant (free)

A mixture of lectures and hands-on activities to introduce and familiarize users with iPlant's major offerings and services

## Days 2 and 3: Interactive tutorials in the iPlant environment

How to perform RNAseq analysis, genome-wide association studies, and inference of genetic networks in iPlant

## Days 3 and 4: Advanced Topics in the iPlant Cyberinfrastructure

Bring a dataset to analyse, a workflow to incorporate into iPlant, or learn how to incorporate the iPlant API into your own applications
