Looking to improve your critical appraisal skills and improve evidence based practice?

Our one day Appraising Evidence Skills Training course will enable current Health and Social Care Practitioners to improve critical appraisal skills particularly in relation to quantitative evidence.

Delivered on either the 17th October 2013 or 28th February 2014, this course includes:

- **The importance of appraisal to inform EBP**
- **An overview of different types of studies**
- **An overview of key statistics which appear in papers**
- **The opportunity to critically appraise a paper(s)**
- **Consideration of the implications for EBP in your area of practice**

This course is available from £99 and can be purchased by the individual student or as part of CPD SLA.
