

# IC DHS 2014

**Tradition, Transition, Trajectories:  
major or minor influences?**  
9th International Committee  
Design History and Design Studies  
9, 10 and 11 July | Aveiro, Portugal

We thank you in advance for promoting this important event among your contacts and apologize if you receive this message from a number of sources.

The aim and scope of this conference is to continue to challenge the intellectual and geographical boundaries of knowledge embraced by design history and design studies, thereby stimulating further exploration and understanding of the tensions between countries 'at the periphery' and those that have conventionally dominated the centre ground.
