

The Faculty of Health & Social Care presents

Free lunchtime seminar:

Exploring the social context of living with behavioural variant frontotemporal dementia

Hilda Hayo is Chief Admiral Nurse/CEO at Dementia UK, and her research explores the experiences of families living with behavioural variant frontotemporal dementia (bv-FTD). There is little research around the lived experience of bv-FTD, and Hilda has sought to explore the effects of living with bv-FTD on social networks. She used a multiple or comparative case study approach to examine an individual family's experience and then compare the experiences between case studies.

Hilda has been a nurse for 34 years, and prior to joining Dementia UK, was Director of Nursing, Quality and Professional Development at Northamptonshire Healthcare NHS Foundation Trust. She has a wealth of clinical experience including setting up a nurse-led service for younger people with dementia and winning a tender for a Department of Health pilot project for Dementia Care Advisors in Northamptonshire.

Dementia UK
Improving quality of life

Date: **2 July 2014**

Time: **13:30–14:30**

Venue: **Library Seminar Rooms 1 & 2, Walton Hall Campus, Milton Keynes, MK7 6AA**

All university staff, students and external visitors are welcome.

Feel free to bring a (cold) packed lunch with you – we will provide tea, coffee and water.
