

# HRP Heritage Science Scholarship

Historic Royal Palaces (HRP) is funding a scholarship, which is targeted at black, Asian and minority ethnic (BAME) candidates accepted onto the UCL MRes in Heritage Science. We particularly welcome BAME applicants as we consider that these groups are currently under-represented both in heritage science and within our own organisation: we believe that there should be better representation of our diverse society in this sector. HRP is committed to building an organisation that truly values the differences in people. We are an equal opportunities employer and truly value a diverse workforce.

Over the two-year period of the scholarship this exciting positive action opportunity will involve spending time studying towards the MRes Heritage Science degree at UCL and with the HRP Conservation and Collection Care department at Hampton Court Palace, developing skills in the area of heritage science research. Heritage science is an interdisciplinary research field encompasses all technological and scientific work that can benefit the heritage sector.

The scholarship covers the course fees for a UK/EU student and a stipend of UKP10,000 a year for living expenses. We are seeking an individual who

Is enthusiastic about science

Has strong intellectual abilities proven with the achievement of a good first degree

Plans to make a career in the UK heritage sector

Has a passion for history and for communicating conservation and heritage science to the public

Having completed the course, the graduate will be expected to seek employment in the UK in the first instance.

If you are interested in this unique opportunity you will be invited to an open day at Hampton Court Palace where you will meet our scientists and discuss our exciting research projects.

Deadline for applications: 15 July 2014 (<http://www.ucl.ac.uk/prospective-students/scholarships/graduate/deptscholarships/sustainable-heritage>)
