

Plant Waxes

From Biosynthesis to Burial

***A workshop designed to explore all facets of plant cuticular waxes:
From their production and physiological roles, to their environmental fate and
diverse applications***

When: 16-20 June, 2015

Where: Congressi Stefano Franscini, Monte Verità, Ascona, Switzerland

Organizers: Tim Eglinton (ETH Zürich); Ansgar Kahmen (U. Basel);
Markus Riederer (U. Würzburg); Guido Wiesenberg (U. Zürich)

Website: plantwax2015.org

Contact: plantwax2015@demariaevent.ch

Themes:

1. Origins & Signatures

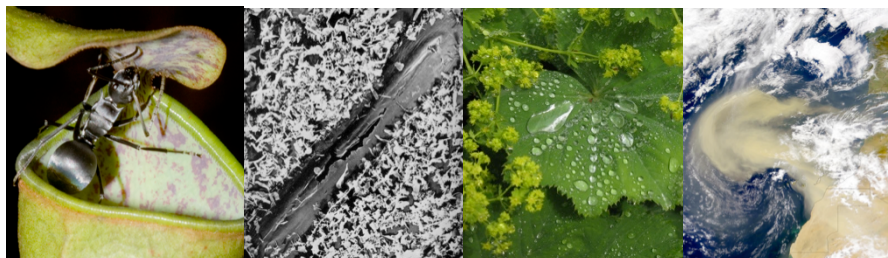

- Evolution and Genetics
- Biochemistry, Morphology & Physiological Relevance
- Biochemical, Physiological Controls on Plant Wax Composition and Isotopes

2. Fate & Legacy

- Preservation and Decomposition of Plant Wax Signals
- Environmental Dispersal of Plant Waxes

3. Applications

- Biogeochemical and Paleoenvironmental Applications of Plant Waxes
- Applications of Plant Waxes in Agricultural, Materials & Energy Science

 Congressi
Stefano Franscini

 European Association
of Organic Geochemists
