

SPM{T<sub>33</sub>}

results: ./face\_rfx12/informed  
 threshold T = 3.356337 {p<0.001 (unc.)}  
 threshold k = 5 voxels

PFWE-corr is 0.000, which is less than 0.05,  
 but the cluster size is smaller than the FWEc  
 extent at the bottom of the page.

Results: *p-values adjusted for search volume*
