

Positions (PhD & Postdoc) available in quantitative developmental Biology in Heidelberg (Germany)

The Maizel lab is offering positions for **one PhD** student and **one Postdoc** to study the morphogenesis of lateral organs in *Arabidopsis thaliana* using light sheet microscopy.

We are looking for highly motivated and talented **developmental biologists** interested in the quantitative analysis of morphogenesis. A strong background in **molecular developmental biology and microscopy** is essential. A prior experience in plant biology is a plus but not a prerequisite.

The Maizel lab is part of the Heidelberg Center for Organismal Studies, and of the Excellence Cluster CellNetworks of Heidelberg University. The campus hosts several other high profiles centers contributing to a lively, multi-disciplinary, and stimulating work environment.

For more informations on the positions see www.maizel-lab.org

To apply, submit a CV and a statement about your motivations to join the lab.
