"One of the leading theoretically informed accounts of Muslim identity politics."  
- *Contemporary Sociology*

"There is little question that the theories put forward have significantly advanced the arguments for plurality, multiculturalism, and mutual understanding" - *Nations and Nationalism*

#### About the book

Interest in Muslim identities, and their interaction with nation-state governance, has assumed a profound significance in research and policy agendas across European politics and society. In order to understand current trends in the adoption and espousal of Muslim identities in Britain, not only is it necessary to obtain a historical understanding of their development through British approaches to minority integration. It is also necessary to look at forms of 'consciousness' that are informing and shaping the assertion of Muslim identities in Britain, and what this can tell us about their future orientation.

In this updated new paperback, Meer further develops a novel sociological and political understanding of Muslim identities in Britain, which is elaborated through case studies of Muslim mobilizations over issues of education, discrimination legislation, media representation, as well as a consideration of the local impact of global concerns.
