

Job offer

Position	Project manager – Cristallographer (H/F)
Start of contract	January 2015
Type of contract	Permanent contract
Employer	<p>NovAliX is a company specialized in external research (medicinal chemistry, protein crystallography, research and development of procedures) and based in Strasbourg-Illkirch (France). NovAliX offers a complete range of services in the field of research and development of small molecules. The company has a team of 40 scientists.</p> <p>The position is based in Saclay, Essonne (South of Paris-France).</p>
Job description	<p>As part of a structural biology platform, your work will consist in:</p> <ul style="list-style-type: none"> - Conducting crystallographic projects from bibliographic work to structure determination, as well as follow up projects, clients reporting, drafting procedures and/or reports. - Managing and supervising a team of research associates. <p>You will be in charge of protein production and purification from different expression systems, and structure determination by X-ray crystallography.</p>
Profile	<p>You should have a PhD in crystallography, with a first post-doctoral experience during which you have deepened and widened your practical and theoretical knowledge in the field of protein purification and crystallography.</p> <p>Additional experience in molecular biology and/or insect cells culture and characterization of protein/ligand complexes would be an asset. We are seeking a person who speaks fluently English and French, who is passionate about structural biology and who has a keen sense of responsibility as well as being a committed team player. The candidate will have a rigorous and organized attitude to work with excellent supervisory and reporting skills.</p>
