The
Geological
Society

As part of the Geological Society's 'Year of Water' this one day meeting will discuss the latest policy and how new technology can benefit the management, regulation, assessment and characterisation of land affected by contamination

Programme

State of Contaminated Land

Matt Llewellyn (Natural Resources Wales)

Ground Gas and vapour, update on the UK's new guidance

Sarah Mortimer (The Environmental Protection Group)

Sustainable remediation options in a changing environment -

Alison Carruthers, (Mott MacDonald)

Removal of a Part 2A designation

Richard Blaney (dbremediation)

Environmental geophysical methods applied to the 3D mapping of ground contamination

Peter Brabham (Cardiff University)

The use of UAV technology to assess ground conditions and improve ground models and risk assessments

Alex Egan (ESI)

Quantifying the loss of available groundwater resource associated with point-source contamination

Tim Bartlett (Advisian WorleyParsons Group)

Using Digital 3D models for complete contamination assessment -

Yolande Macklin (ARUP)

Coed Darcy: A Catalyst for regional regeneration

Mike Poland (Atkins Ltd)

Remediation of chlorinated solvents during large scale development – *Neil Hopkins (Celtic)*

Ensuring Sustainable Remediation through the use of Early, Detailed Investigation Techniques

Zoe Miller (Grontmij)

SOBRA Register of Risk Assessors

Tim Cawood (Society for Brownfield Risk Assessment)

CL:AIRE The future of sustainable reuse of land

Rob Sweeny (CL:AIRE)

Introducing the national quality mark scheme

Matt Whitehead (Environment Agency)

Booking information

£100 for Fellows of the Geological Society

£125 for non-Fellows.

Book before 31 January 2016 for an Early Bird discount of £30 off the ticket price

Price includes buffet lunch and morning and afternoon refreshments. To book your place please visit:
