

Phenotyping for photosynthesis & Productivity

Satellite meeting of the Photosynthetic congress

University of Essex

4th – 6th August 2016

This two-day conference will address recent advances in phenotyping of plant canopies and algae. We intend to invite speakers from academia and industry to discuss the physiological and technical principles of phenotyping in addition to applications in the world of industry and agricultural research. We adopt a forward thinking approach where phenotyping is a new branch of plant physiology that can address fundamental scientific questions as well as applied problems of global food and energy security.

Confirmed keynote Speakers

Prof David Kramer - Michigan State University
Prof. Robert Furbank, ARC, Australia.
Prof Malcom Hawkesford, Rothamsted
Dr Padraic Flood, MPG, Germany.
Prof. José Luis Araus Ortega - University of Barcelona
Dr Onno Muller, Plant Sciences, Jülich

Industrial sponsors

- Phenospex
- ADC Ltd.
- Technologica Ltd.
- Heinz Walz GmbH
