

MULTILINGUAL LEARNERS IN CONTEXT

EAL, community and international school settings

This symposium brings together academics and practitioners from three importantly different but intrinsically related learning contexts for multilingual learners: mainstream schools, international schools, and community/supplementary schools.

This opportunity to examine the commonalities and peculiarities of these contexts, exchange knowledge, and consider ways forward in meeting the needs of multilingual learners has the potential to radically shape the way we think about and deliver effective provision for our language learners.
