

Want to upgrade your skills with a new qualification?

Want to do this through work-based practice?

Want to learn more about technology-enhanced learning?

Want to gain Fellowship of the HEA?

We want you on our MSc Blended and Online Education (MSc BOE)

Postgraduate Certificate | Postgraduate Diploma | Master of Science

The programme's HE Pathway provides a route to Fellowship of the HEA

The MSc BOE is designed for educational professionals seeking to enhance their knowledge, understanding and skills in the area of teaching and learning with technology.

What it's about...

It is a part-time, fully online programme that provides participants with practical opportunities to develop, implement and evaluate technology-enhanced approaches that harness online tools and resources for a flexible, more creative learning and teaching experience.

Participants will normally be lecturers, course developers, or other professionals who work in a teaching or teaching and learning related role in FE, HE or staff development.

You might be completely new to technology-enhanced education, or you may want to take what you are already doing well even further. Explore hands-on what current and emerging technologies can really offer when used appropriately, and where it can help with the wider challenges that you, your students, your colleagues, training departments and educational institutions face in today's digital world.

Edinburgh Napier
UNIVERSITY

- Study within a highly supportive online environment, working alongside tutors and fellow participants in the programme's virtual learning environment
- Collaborate across a range of other online spaces including authoring tools, virtual worlds and social networking spaces
- Draw from your own professional working environment
- Study alongside your peers and tutors online, as well as learning from nationally and internationally renowned guest experts

Modules you'll study...

Postgraduate Certificate

- Introduction to blended and online education
- Supporting the blended and online student experience
- Curriculum design and development for blended and online learning

Postgraduate Diploma (three further modules)

- Emerging digital technologies in blended and online education
- Education research methods and practice
- Customised study in blended and online education

MSc BOE additionally involves undertaking the dissertation module.

The MSc BOE is now recognised by the Staff and Educational Development Association (SEDA). Successful completion of any exit award will bring with it your own individual SEDA professional accreditation in Embedding Learning Technologies.

The HE Pathway through the programme is accredited by the HEA, providing a route to Fellowship of the HEA for those working in Higher Education.

Apply today!
